A New World

When you paddle, it's impossible not to briefly escape reality. For paddlers, this escape is essential, offering a chance to disconnect and reconnect with nature. And for those new to paddling, there's no better way to dive into the world of adventure and find that sense of release.

In a world undergoing dramatic changes, these breaks become even more vital. Some changes bring progress, but many feel overwhelming—economic uncertainty, geopolitical challenges, environmental issues, and the rapid evolution of technology. In moments like these, getting out on the water provides a necessary mental reprieve, allowing us to reset and regain clarity.

The paddlesports industry, like many others, has faced various challenges over the past two years. The post-COVID economy is different—more complex, and in many ways, tougher. Businesses are adapting to new consumer behaviors, navigating supply chain struggles, and adjusting to a rapidly changing market.

Yet, despite these hurdles, the industry is thriving. More people than ever are discovering the joy of being on the water, and the variety of watercraft available has exploded. From traditional canoes to foil boards, sea kayaks to inflatable crafts, whitewater to fishing boats, the sport is more diverse and accessible than ever before. The demand for high-quality, innovative gear is on the rise.

At the same time, older technologies like composites, wood, and folding boats are making a comeback, offering lighter, stronger, and more durable

designs. These innovations are reshaping the paddling experience, making the sport even more accessible and attractive to a broader audience.

Sustainability is no longer a buzzword—it's now a core focus in the industry. Brands are rethinking materials, streamlining production, and committing to greener practices. This is a positive trend, ensuring a more sustainable future for both our sport and our planet.

Looking ahead, innovation will keep driving paddlesports forward. New materials and smarter designs will make gear more efficient and better suited to paddlers' needs. Technologies like AI will likely influence everything from boat design to manufacturing, improving performance, accessibility, and so much more we can not yet imagine.

However, we must also acknowledge the growing impact of the current climate crisis. Global warming is accelerating, and the places we paddle are changing before our eyes. Recent events are a stark reminder of why staying connected to nature matters now more than ever.

Amidst all this uncertainty, paddling remains one of the best ways to find balance. In times of change, paddlesports offer a chance to escape, enjoy nature, and momentarily forget the world's problems. As you explore the 2025 Paddler's Guide, we hope you find new ways to enjoy every stroke and find peace on the water, even in a rapidly changing world.

The Team at Kayak Session Publishing

The 2025 Paddler's Guide is a special edition of Kayak Session Magazine (0725K83428 - ISSN 1638-0177) edited by Kayak Session Publishing. **Publisher:** Philippe Doux - **Buyers Guide Magazine Editor:** Lucien Schreiber - **Buyers Guide Product editor:** Sandra De Ugarle - **Assistant to the editor:** Jean Filtamaire - **Art Director:** Jean-François Pascal - **Contributing Photographers:** Andrew Kellett, David Sodomka, Neil-Mark Thomas, Caleb-Jones, Michael-Henry - **Advertising & Editorial office:** 5 Quai des étroits, 69005 Lyon, France. - Info@kayaksession.com (Free supplement to Kayak Session #93 - cannot be sold separately)

Warning: The activities shown in Kayak Session carry a risk of personal injury or death. Whitewater kayaking, and others outdoor activities are inherently dangerous. The owners, management, and staff of Kayak Session recommend you do not participate in these activities without first seeking qualified instruction and/or guidance, understanding the risks involved, and personally assuming all responsibility for those risks. **Disclaimer:** Opinions expressed in this magazine are not necessarily those of the Editor or Publishers. KAYAK SESSION MAGAZINE

The International Whitewater Magazine

"If a photo speaks a thousand words, then Kayak Session is an encyclopedia..."

Released quarterly for the past nine years, Kayak Session has established itself as the prime resource for information on whitewater kayaking worldwide.

PADDLE WORLD MAGAZINE

The International Paddle Culture Magazine

Based on the same concept as Kayak Session, Paddle World is an annual issue magazine released every spring covering literally all paddlesports—sea kayaking, stand-up paddling, canoeing, recreational boating, kayak fishing, and more.

STAND UP PADDLE WORLD MAGAZINE

An annual special issue dedicated to Stand Up Paddling

This is the newest water sport that has taken the world by storm. SUP World Mag is an annual special issue that started in the spring of 2010 that covers nearly everything SUP has to offer; leisure, fitness, racing, family fun, touring, distance paddling.

CIVIL SECURITY: A GROWING MARKET FOR PADDLESPORTS MANUFACTURERS

As natural disasters intensify, paddlesports manufacturers are seizing opportunities to meet the growing demand for civil security gear, benefiting both professional responders and recreational paddlers.

Catastrophes such as floods, mudslides, and hurricanes have become all too common, often appearing on our screens and, increasingly, in places familiar to paddlers. The floods in Green River Cove, USA, following Hurricane Helene in October 2024, and the catastrophic floods in Valencia, Spain, only a couple of weeks later, are vivid reminders of the increasing frequency and severity of such events, and the urgency of the current climate crisis. As these events multiply, the demand for specialized rescue equipment has surged. Paddlers can even spot rescuers using gear from familiar brands in recent reports and news. While this demand stems from tragic circumstances, it creates a significant opportunity for paddlesports manufacturers.

Rescue services rely on a wide range of equipment familiar to paddlers: drysuits, PFDs, ropes, quick-release belts, water shoes, gloves... the list continues. Beyond personal protective equipment, rescuers may also use compact, inflatable evacuation sleds, rescue rafts, boats, or paddleboards to safely navigate debris-filled or shallow floodwaters. These tools have become indispensable for evacuation in any environment where rescue services operate, from urban flood zones to challenging and remote waterways. Although much of this gear resembles recreational

equipment, its technical specifications can be far more demanding. With rising demand and increasingly specific requirements, manufacturers are adapting their expertise, products, and skills to develop new product lines that address the unique challenges of civil security operations.

The civil security gear market has seen remarkable growth in recent years. Lawrence Harris of WRS International notes that while his company has been producing rescue boats and equipment since 2015, the recent spike in demand reflects an urgent need for innovative solutions, especially for personal protective equipment. This trend seems to span the industry, with manufacturers recognizing both the necessity and the opportunity to invest in better-adapted, high-performance rescue gear.

For instance, images from the Valencia floods often show responders in full protective gear but wearing neoprene wetsuits. Marco Babuin of Sandiline reminds us that these are strongly discouraged for flood situations, as neoprene offers little protection against bacteria, hydrocarbons, and pathogens in contaminated water, which can lead to long-term health impacts. Instead, drysuits provide far superior protection against biohazards and harsh environments. The demand for high-quality rescue-specific drysuits is expected to increase, driven not only by the increasing challenges posed by natural disasters but also by greater awareness of safe practices and improved funding. Many rescue organizations can now afford full lines of drysuits thanks to government grants and organizations spending in the sector—trends that gained momentum following Covid and have only continued to grow. Manufacturers are working in tandem with rescue professionals to better understand their unique needs and the often-merciless conditions rescuers face. Manufacturers must meet rigorous standards and perform extensive testing, often far beyond what leisure equipment requires. As Guillaume Barbier of Aquadesign explains, "This sector brings together passionate individuals often working in extreme conditions, testing equipment designed to meet highly specific requirements. These field reports inspire many ideas and technical advances."

Indeed, beyond benefiting rescue professionals, these innovations also positively impact recreational paddlesports. Technologies developed for civil security often translate into better product design, quality, and performance applicable across all sectors. Innovations in inflatable technology are particularly notable, as they cater to the remote access and ease of use needed by professional response teams, many of whom have limited training in whitewater environments. While packrafts

**"LOOKING AHEAD, THE GROWING
DEMAND FOR ADAPTED EQUIPMENT FROM
CIVIL SECURITY PROMISES CONTINUED
INNOVATION AND OPPORTUNITY. IT'S A
TRUE WIN-WIN FOR THE INDUSTRY."**

“WITH RISING DEMAND AND INCREASINGLY SPECIFIC REQUIREMENTS, MANUFACTURERS ARE ADAPTING THEIR EXPERTISE, PRODUCTS, AND SKILLS TO DEVELOP NEW PRODUCT LINES THAT ADDRESS THE UNIQUE CHALLENGES OF CIVIL SECURITY OPERATIONS.”

have gained popularity for the access they open to outdoor sports enthusiasts, specialized teams also benefit from advancements in their design and durability. Broader innovations such as GPS technologies further enhance safety and navigation, even outside paddlesports.

Manufacturers frequently test their products in partnership with civil security teams, simulating real-world flood conditions in controlled environments like man-made whitewater courses to ensure optimal performance. In turn, these courses have become valuable training and testing centers. Extreme whitewater kayakers can also offer valuable insights. Their first-hand experience in unpredictable, high-risk environments, far beyond the controlled settings of artificial courses, can drive innovations that make rescue gear more adaptable to a broader range of conditions. By incorporating feedback from both professional responders and experienced paddlers, manufacturers can further enhance the safety, functionality, and versatility of their equipment.

Looking ahead, the growing demand for adapted equipment from civil security promises continued innovation and opportunity. It's a true win-win for the industry. Equipment designed for civil security aids professionals and also enhances recreational paddling experiences, keeping everyone safe on the water.

However, even the best gear in the world cannot replace proper training. Efficient rescues depend on the knowledge and preparedness of the responders using the equipment. This is where the paddlesports industry can play another crucial role: providing training and learning opportunities to ensure both safety and ef-

fectiveness in rescue operations, a trend is already underway, as seen in the rapid development of training courses like Rescue 3, which are taught by whitewater professionals worldwide to civil security organizations. This growing emphasis on training is also good news for the industry, reinforcing the connection between paddlesports expertise and real-world rescue operations.

BEYOND THE GREENWASHING: HOW TO MAKE INFORMED CHOICES WHEN BUYING PADDLESPORT GEAR

Brands are making real progress in reducing their environmental impact, tackling sustainability from multiple angles—better materials, smarter design, recycling initiatives, energy-efficient production, and increased transparency. But for consumers, it's easy to get lost in a sea of eco-labels, bold claims, and overwhelming buzzwords. The outdoor and paddlesports industries are under pressure to clean up their act, and while most manufacturers are working towards better practices, sustainability is never a simple, clear-cut issue. There is no such thing as a “perfectly sustainable” product; every choice comes with trade-offs. This article serves as a tentative guide to looking beyond marketing and making more informed choices about environmental sustainability in paddlesports gear.

Brands can direct their sustainability efforts towards many areas: recycling, circularity, packaging, supply chains, harmful chemicals, repairability, and end-of-life solutions, to name a few. With so many factors at play, it's easy to get lost in trying to determine what really matters for the environment. In reality, every step towards sustainability is a good step. No brand can be perfect, but understanding why a company prioritizes certain aspects over others is key to making informed choices.

Transparency

A good place to start is by looking at how a brand presents its sustainability commitments. Most manufacturers now have a dedicated section on their website or their mission statement, but how easy is it to find out more about their commitments and their impact? Try searching for it now. A brand that is transparent and specific about its efforts is far more likely to be working towards meaningful sustainability rather than just using it as a selling point. That said, not all brands have fully communicated about their efforts yet. Transparency is key, but some companies may be making real progress behind the scenes without having put it into words.

Finding that dedicated section won't tell you everything, but it will give you a good first impression of what the brand is doing and why it is focusing on those areas. Take a closer look: is the text full of vague promises, or does it provide clear facts, specific numbers, and measurable actions? Does sustainability feel like a genuine commitment, or just a marketing buzzword? One of the biggest challenges in assessing sustainability is “greenwashing,” when a brand highlights only the most eco-friendly aspects of a product while ignoring the rest. It's easy to showcase only the positives while glossing over the bigger picture. So look for concrete steps rather than elusive statements, stay curious, and ask questions.

Recycling or greenwashing?

Recycled materials provide a good example of why details matter. First, it's important to differentiate between recycled and recyclable plastic. The former means the product is made from plastic that has already served another purpose, while the latter simply indicates that the product can be recycled—but doesn't guarantee that it will be.

In kayak manufacturing, for example, does the brand clearly state what percentage of the product is made from recycled content? As Diego Zanga of Dragorossi and Rainbow Kayaks points out, recycled plastic can come from three sources: post-production waste (offcuts like cockpit trims), post-consumer waste (materials that have been used and discarded), and general plastic waste. The source matters because plastic from post-production or post-consumer waste can be used in much higher percentages (up to 100%), while plastic from general waste is typically limited to around 30% before mechanical properties are affected, requiring virgin plastic to make up the difference.

So, how does the recycling process actually work? And where does the material come from? To grind plastic into powder, a significant amount of material is needed. Does the brand actively collect and recycle old kayaks and offcuts, or do they source pre-ground recycled plastic from external suppliers? What happens if that supply runs out? Again, transparency matters. If a claim feels incomplete, it's worth questioning what's left unsaid.

The full life cycle

Looking at the full lifespan of a product is just as important as assessing how it's made. Does the company think beyond simply selling its products? Are they taking action to cover the entire life cycle of what they produce? Durability is one of the simplest and most effective ways to reduce waste. A truly sustainable product is one that lasts, and when it eventually wears out, it should be repairable. Some brands offer repair guides, take-back schemes, or buy-back programs for old gear. A quick test is to check how easy it is to find their return or repair page on their website. If it's buried or difficult to understand, repairs—and meaningful sustainability—may not be a real priority.

Beyond repairability, what happens when products eventually reach the end of their life? Brands that consider the entire lifespan of their products shouldn't be seen as expecting their gear to fail more often. Instead, they should be recognized for doing the right thing: investing extra time, money, and effort to ensure their

“NO PRODUCT IS 100% SUSTAINABLE, BUT THAT DOESN’T MEAN WE SHOULD GIVE UP OR ASSUME ALL EFFORTS ARE MEANINGLESS. PROGRESS IS HAPPENING, AND THE INDUSTRY IS EVOLVING.”

products have minimal environmental impact. An example is Peak PS, which won the 2024 Paddle Sports Show Sustainability Award for its Circular Ready Program. This initiative rethinks paddlesports gear by designing products for full recyclability, using materials and patterning that allow for easy deconstruction at the end of their lifespan.

At last year’s Paddle Sports Show, various challenges of sustainability and circularity were brought into focus by Bob Timms of PGL. For the past two years, Timms has been running a conference at the show in collaboration with Kayak Session Publishing, bringing industry leaders together to discuss pressing environmental issues. What happens across the entire life cycle of a product? How can brands take greater responsibility? To address these questions, Timms, Jean-Yves Lapeyrere, founder of the European Confederation of Outdoor Employers, and the Paddle Sports Show have recently brought together a working group of manufacturers to develop better industry-wide solutions for recycling, upcycling, and reuse initiatives. Should companies invest in in-house systems to process waste, or rely on external services? How can products be brought back for recycling without increasing transport costs and emissions? How is paddlesports equipment currently disposed of, and what improvements can be made? These are the kinds of challenges that demand collective action. As part of this effort, Timms also introduced the idea of a

sustainability label, similar to B-Corp certification, to provide a structured framework for brands to implement their sustainability efforts more effectively.

Everything matters

Environmental sustainability in paddlesports spans everything from chemical use and transportation to packaging and end-of-life solutions. But sustainability isn’t just about the environment; social and economic factors matter too. Prijon won the 2025 Paddle Sports Show Sustainability Award for its regional and eco-friendly approach—sourcing over 80% of components locally, generating renewable energy in-house, reducing transport emissions by manufacturing entirely in Germany and using recyclable, non-toxic materials as much as possible. Sustainability is a broad concept, and no brand excels in every area, so here’s a non-exhaustive list of additional questions:

Does the company use PFAS or other harmful chemicals? Is it working on safer alternatives? Does it follow international or community standards? How complex is its supply chain, and how much transport does it require? Does it overuse plastic packaging? Does it ensure fair wages and safe workplaces? Does it support employee ownership? Does it help finance conservation efforts?

The reality is that no brand is perfect. At least not yet. No product is 100% sustainable, but that doesn’t mean we should give up or assume all efforts are meaningless. Progress is happening, and the industry is evolving. Consumers have a role to play too. The key is to stay informed, look beyond the marketing, and make choices that align with what we believe truly matters. The signals we send shape the industry. We have the power to say, “I don’t mind if my gear isn’t individually wrapped in plastic,” or “I’d rather buy a product that lasts longer, even if it costs a bit more.” Every decision, whether from consumers or the brands leading the way, contributes to the change we want to see and helps make paddlesports as sustainable as possible.

BREAKING THE MOLD: THE RESURGENCE OF COMPOSITE BOATS

Once the standard for crafting competition and leisure kayaks, composites have spent over 35 years overshadowed by the rise of plastic boats. Yet, in the past decade, a resurgence is underway, with new players entering the market and some brands focusing exclusively on composite designs. More and more boutique-style brands are emerging, often small, family-run businesses emphasizing artisanry, authenticity, and passion-driven design. Are we witnessing a turning point in kayaking, or will plastic continue to dominate the market?

When we think of composite boats, we often associate them with high-performance and competitive paddling. Carbon and fiberglass kayaks are renowned for their competitive advantages, being lighter and more responsive than their plastic counterparts. However, the benefits of composite boats extend far beyond the world of elite paddling. Their lightweight design makes them an excellent choice for paddlers looking to conserve energy, whether carrying the boat or paddling long distances. This reduced weight enhances ac-

cessibility, making the sport more inclusive for children, older paddlers, or those with disabilities, for whom shedding a few fewer kilos can make a significant difference. Stephen Wright, owner and boat builder at Dreamboats Kayaks, shares: "Composite boats are so fun! Lighter, stiffer boats are a dream to paddle. For someone who wants to maximize their fun while playboating or paddle on deeper rivers, there's nothing like the feel of a carbon composite boat."

The advantages carbon boats offer might help attract new paddlers into kayaking, or encourage those who've stepped away from the sport to return. As Eric "EJ" Jackson highlighted at last year's Paddle Sports Show, many former paddlers are eager to return to the water. While they may still have old gear at home, it does not mean they want—or can—use it. Beyond social support like lessons or peer paddling groups, these paddlers need equipment suited to their current abilities. EJ believes carbon boats are key to removing these hurdles, making it easier for them to return to finding joy on the water self-sufficiently. These paddlers are looking for boats that they can paddle comfortably without fatigue and easily load onto their car without needing help. Composites are already well-established in some disciplines, like sea kayaking or canoeing. For example, composite sea kayaks have a solid presence in the leisure

market, with brands like P&H and Lettmann catering to this demand. However, in areas like whitewater kayaking or fishing, where EJ's Apex Watercraft is focusing, composites represent a largely untapped opportunity. Composite boats not only offer a unique experience on the water and improve accessibility, but they also provide unmatched opportunities for personalization. Manufacturers can customize features such as shape, volume, color, artwork, seat placement, and outfitting to meet the specific preferences and needs of indi-

vidual paddlers. Ed Skrzypkowski from Murky Waters highlights the flexibility of composite manufacturing, noting that almost 50% of the kayaks they produce have altered volume compared to the original plastic version. Guillaume Respaud of Guiguiprod also exemplifies this with his freestyle kayaks featuring stunning, one-of-a-kind artworks. This reflects the growing appeal of owning a boat that fits perfectly and stands out with its unique style.

"COMPOSITE BOATS NOT ONLY OFFER A UNIQUE EXPERIENCE ON THE WATER AND IMPROVE ACCESSIBILITY, BUT THEY ALSO PROVIDE UNMATCHED OPPORTUNITIES FOR PERSONALIZATION."

So, where do composites stand today? Should we expect them to take over the plastic market?

Before attempting to answer this question, it is worth remembering that composite materials once dominated the market long before plastic came into play. Early kayaks were crafted with wooden frames covered in waterproof canvas or

rubber, and by the 1950s, fiberglass emerged as a transformative material. It revolutionized production methods, making composite boats the standard until the introduction of roto-molded polyethylene a few decades later. But even today, plastic and carbon are not as far apart as they may seem. Many mass-produced plastic kayaks still begin as composite prototypes, allowing brands to refine their designs before large-scale plastic production.

Nevertheless, despite their many advantages, composite boats come with notable trade-offs. First, they are expensive. Their labor-intensive production process—each boat handcrafted in a mold with materials like carbon, Kevlar, and resin—significantly increases their cost, positioning them as premium products. Additionally, their lower resistance to impact makes them prone to cracking, especially in rocky rivers or during heavy use. Composite boats also require more maintenance, which can be a drawback.

When plastic boats were first introduced, they revolutionized whitewater paddling by allowing paddlers to go over rocks instead of needing to maneuver around them. Their ability to be mass-produced, stored more easily, and shipped with less concern made them a practical choice for a wide range of users. This is still the case today. Their affordability and durability enable clubs, leisure centers, and rental facilities to offer kayaks to a broad audience, which remains unrealistic with carbon boats. However, collaborations between brands, both recent and historic, demonstrate that there is still vast potential in blending the strengths of both plastic and carbon. First, plastic boats are frequently translated into carbon models, allowing brands to adapt their proven plastic shapes into high-performance composite versions. But those partnerships can also be reversed. Last year, Pyranha and Guiguirod teamed up to adapt Guigui's Helectron into a plastic model, making a high-performance freestyle shape more accessible. Similarly, Exo mass-produced Guigui's Helixir a few years earlier. These collaborations benefit both sides: small-scale carbon manufacturers can bring innovative designs to a broader market, while larger plastic brands can reduce R&D costs

"MANY FORMER PADDLERS ARE EAGER TO RETURN TO THE WATER. WHILE THEY MAY STILL HAVE OLD GEAR AT HOME, IT DOES NOT MEAN THEY WANT—OR CAN—USE IT."

and (re)explore niche markets without the risks of designing entirely new models. Hybrid designs that combine plastic and composite elements also provide another way to harness the advantages of both materials, hitting a balance between performance and cost-effectiveness. For example, carbon outfitting can reduce weight, improve rigidity, and allow for more customization without requiring a composite hull. With the inclusion of kayak cross in the Olympic Games, the adoption of carbon outfitting in whitewater designs is likely to grow, catering to the evolving needs of competitive and non-competitive paddlers alike. Last year, Zig Zag supplied many Olympic kayak cross boats with carbon outfitting, but those seats are also available for general purchase, making high-performance outfitting accessible to a wide range of paddlers.

The answer is clear: carbon boats are not expected to dominate the market anytime soon. Plastic kayaks, with their affordability, durability, and mass production, will remain the backbone of the sport, ensuring kayaking stays accessible to the widest range of paddlers. But composite boats can address needs that plastic production cannot yet fully

satisfy. By enabling lighter designs, they make the sport more accessible while enhancing competitive performance and offering personalized designs. At the same time, they create a premium niche market, encouraging a shift towards higher spending on quality equipment—a pattern well established in sports like skiing and cycling but not yet widespread in paddlesports. Though they may never replace plastic, innovation and collaboration in composite manufacturing are opening the sport to new paddlers and offering exciting ways to explore the water.

AFTER THE HYPE: WHY KAYAK MANUFACTURERS SHOULD PAY ATTENTION TO PADDLEBOARDING

After years of rapid growth, the stand-up paddleboarding market is slowing down. Some companies see this as the end of the boom, but demand isn't disappearing; SUP remains one of the easiest ways for newcomers to get into paddlesports. Rather than viewing this as a downturn, kayak manufacturers could see an opportunity. By applying their expertise to paddleboarding gear, they can not only expand their market reach but also strengthen their presence in the broader paddlesports industry.

The SUP industry has seen significant fluctuations in recent years. After a period of rapid growth when it seemed like everyone was grabbing a board and hitting the water, the industry is now experiencing a serious slowdown. Manufacturers, even those with strong initial positions, are struggling with reduced demand, over-supply, and shrinking profit margins. SUP board manufacturers are not the only ones feeling the effects. Pete Astles of Peak PS explains, "The bubble seems to have burst in the SUP market. We are experiencing low sales volumes and little interest in SUP-specific products right now, despite developing some nice lines especially for the discipline." Astles suspects this is partly due to the boom through Covid, followed by the subsequent oversupply of inventory in the marketplace, and recent economic conditions. Yet, Astles remains optimistic. "Fingers crossed we'll see growth again soon."

Rather than seeing this as a reason to step away, traditional canoe and kayak manufacturers can recognize this shift as an opportunity to step in. The post-boom period is a chance for brands with a long-term vision to bring quality, safety, and innovation to the paddleboarding market, rather than competing in an oversaturated one.

One of the key reasons paddleboarding initially boomed is its accessibility. Unlike kayaking or canoeing, which require more equipment and technical skills, stand-up paddleboarding is easy to pick up. That same accessibility ensures SUP will continue to attract casual paddlers, fitness enthusiasts, and families looking for a simple way to get on the water. Notably, the fitness market, much like the rise of surf skiing, is expanding rapidly, offering a visually appealing and accessible way to stay active. For traditional paddlesports manufacturers, the current situation presents

"TRADITIONAL PADDLESORTS BRANDS CAN POSITION THEMSELVES AS FULL-SERVICE PROVIDERS, OFFERING MULTIPLE ENTRY POINTS FOR NEWCOMERS AND RETAINING THEM AS THEY EXPLORE RELATED ACTIVITIES."

an opportunity to expand into the SUP sector, and there are various reasons they should consider stepping in.

First, expanding into paddleboarding isn't a major leap. The skills required to produce SUP gear align closely with those already present in kayak and canoe manufacturing. Many materials, design principles, and production techniques overlap. Manufacturers can diversify their portfolio by offering SUP-specific gear or adapting existing lines, such as lifejackets, neoprene pants, or leashes.

Beyond adding another product to their lineup, manufacturers entering the SUP market can build a more interconnected product ecosystem. A consumer who starts with an entry-level paddleboard may later transition to a recreational kayak or touring canoe. Cross-promoting essential gear such as paddles, PFDs, and technical apparel can increase brand loyalty and encourage repeat sales. Once a brand establishes itself in the SUP sector, it creates a pathway for consumers to explore other paddlesports under the same brand umbrella.

Expanding into the SUP market also opens up new retail possibilities. Many lakeside and coastal shops primarily stock beginner-friendly watersports equipment, which may not include kayaks or canoes. By offering a SUP line, manufacturers can more

easily enter these spaces, establishing relationships with retailers, outfitters, and rental businesses. Retailers that previously focused on surfboards or casual boating equipment may be more inclined to stock kayaks, canoes, and apparel once they have a SUP line from the same brand.

Another compelling reason is safety. Many newcomers underestimate the importance of proper equipment, often seeing paddleboarding as a casual, no-gear-needed activity. By featuring PFDs in ads and developing SUP-specific safety gear, manufacturers can shift perceptions and encourage better practices. Paul Robertson of Palm Equipment explains, "Working closely with the [SUP] community has been both challenging and rewarding. We've used our expertise to develop better waist leash systems and a slimline PFD with an integrated chest belt. But it's not just about the gear—it's about spreading awareness, especially among beginners." By bringing their expertise from kayaking, manufacturers can help shape a culture that values safety, making SUP more sustainable in the long run.

Finally, consumer perception of paddlesports is shifting. While brands often categorize kayaking, canoeing, and stand-up paddleboarding as distinct disciplines, many consumers see them simply as different ways to get on the water. This merging of disciplines creates opportunities for cross-industry innovation and product diversification. Traditional paddlesports brands can position themselves as full-service providers, offering multiple entry points for newcomers and retaining them as they explore related activities. Diversification has to be strategic. A brand that tries to do everything risks spreading itself too thin. But every company can find something valuable to bring to the SUP market and, in turn, gain something from it.

While the SUP boom may be over, paddleboarding is far from fading. Its appeal remains strong, driven by accessibility and ease of use. The initial hype may have passed, but the potential remains—and those who recognize it now will be best positioned for the future.

THE EVOLUTION OF WOMEN'S GEAR AND INCLUSIVITY IN PADDLESPORTS

A few decades ago, women in paddlesports had to “make do”—squeezing into drysuits designed for men, battling oversized PFDs, and settling for paddles that didn't quite fit their grip. While women's-specific gear has existed for some time, brands now prioritize it more than ever. They're moving beyond the old “shrink it and pink it” approach and designing with women in mind, driven by a growing wave of female paddlers who demand better.

Women's participation in outdoor sports has surged in the last decade, and paddling is no exception. This growth has driven the development of more women's-specific gear, creating a virtuous cycle where better equipment attracts more participants, which in turn pushes brands to innovate further.

As Palm Equipment puts it, everyone's experience on the water should be safe, fun, and comfortable, and achieving this requires gear that fits well, is functional,

and lasts. But has such equipment always been available to women, or have female paddlers had to adapt men's gear to fit their needs? For years, much of women's paddling gear was simply men's gear in smaller sizes, designed with little input from female paddlers. The “shrink it and pink it” approach often prioritized aesthetics over performance and fit.

An example of early innovation came in 1992 when Palm developed the S PFD for a female-led expedition in the Himalayas, featuring a lower profile and advanced safety elements tailored to women's bodies. Also around that time, in 1994, Kokatat introduced women's sizing and has since built an extensive line of paddling gear, moving beyond downsized men's patterns to designs tailored to female anatomy. Palm has likewise continued to expand its women's range, now offering a wide selection of gear designed for better fit and performance.

Brands now recognize that designing for women isn't just about resizing gear, but addressing fundamental differences in torso length, shoulder width, and hip-to-waist ratios. Pete Astles from Peak PS explains that after research showed unisex size grading didn't accommodate the diverse shapes of female paddlers, they adjusted proportions like arm and leg length to ensure a better fit.

Drysuits highlight a particularly long-standing issue in paddling gear. Entry and relief zips are a key functional difference between men's and women's designs. Today, brands offer more options than ever, from front and back entry zips to front and drop-seat relief zips. However, some combinations remain limited, forcing paddlers to choose between fit and function. For instance, women looking for front relief zips, or men seeking drop-seat relief zips, often have to turn to models designed for the other gender, compromising either comfort or practicality. While some brands are starting to offer new combinations that address these gaps, such options remain relatively uncommon.

Level Six recently took a more data-driven approach, launching a survey to address long-standing complaints about poor fit, particularly in drysuits. With a team that is 50% women, including a majority of female designers, they wanted concrete data to drive improvements in their collection. The results reinforced what paddlers had long reported: fit issues are widespread, and industry-wide change is needed. “For any brands out there, this [survey] is well worth doing,” says Stig Larsson.

To design inclusive gear, brands should listen to all paddlers, not only pro athletes or team paddlers. Fit, functionality, and comfort vary widely, and open surveys can be a valuable way to gather broad feedback and demonstrate a real commitment

“YET, THIS PROGRESS HINGES ON A BALANCE OF SUPPLY AND DEMAND. BRANDS NEED WOMEN PADDLERS TO DEVELOP TAILORED GEAR, JUST AS WOMEN PADDLERS NEED GEAR THAT FITS THEM.”

"FOR YEARS, MUCH OF WOMEN'S PADDLING GEAR WAS SIMPLY MEN'S GEAR IN SMALLER SIZES, DESIGNED WITH LITTLE INPUT FROM FEMALE PADDLERS. THE 'SHRINK IT AND PINK IT' APPROACH OFTEN PRIORITIZED AESTHETICS OVER PERFORMANCE AND FIT."

to inclusivity. Women should be actively involved in the design process to ensure gear meets the needs of all female paddlers. As Gabriella Pevec, designer at Kokatat, explains, the brand integrates real-world testing by using paddlers of different sizes, both men and women, in the patterning phase to assess fit, and specifically relies on women field testers to push prototypes to their limits.

Beyond apparel, gender-specific labeling has yet to extend to kayaks or paddles. And we raise the question, does it need to? Or does the current flexibility already meet the paddlers' needs? Manufacturers already offer a range of options, such as different paddle shafts, blade shapes, and boat sizes, allowing consumers to choose based on personal preferences. Features like adjustable hip pads, knee pads, footrests, and even seat cushions ensure a customize fit for every paddler, regardless of gender. The trend towards modularity seems to address many individual differences already, and while gender labels are meant to guide choices, they don't necessarily guarantee the best fit or functionality. In other sports, such as skiing and cycling, gendered models are common, so it's worth considering whether a similar approach would benefit paddlesports in the future.

Overall, the growing availability of women-specific gear reflects a broader shift

towards inclusivity in outdoor and paddlesports, driven by increasing participation. While progress has been made very quickly in the past few years, the road is still long, and true inclusivity goes beyond equipment. Mark Deming, chief marketing officer at NRS, explains: "We can build on this trend by being more inclusive in brand marketing, paddling events and competitions, and the paddlesports media." Ensuring that all paddlers—regardless of body type, gender, age, or ability—feel represented and supported is just as important as the gear itself. Thoughtful choices like offering diverse color options (beyond stereotypical pink) and ensuring a wide range of sizes play a role in making paddling more accessible and enjoyable for all.

Yet, this progress hinges on a balance of supply and demand. Brands need women paddlers to develop tailored gear, just as women paddlers need gear that fits them. While manufacturers may have once hesitated to invest in women's equipment due to perceived low demand, this is no longer the case. By continuing to innovate, listen to feedback, and involve women in every aspect of the design process, brands can ensure that paddlesports remain safe, fun, and accessible for everyone.

BOATS & BOARDS

Whether exploring inland waterways such as lakes and rivers, quiet ponds, raging torrents, or navigating the open sea, there is a boat for every adventure. The original paddlesport vessel, each watercraft features shapes and styles designed for a different function but the same purpose: traveling on water. For as Kenneth Grahame's Water Rat said to the Mole: "Believe me, my young friend, there is nothing—absolutely nothing—half so much worth doing as simply messing about in boats."

RTM - MID-WAY

The MID-WAY seamlessly blends the performance characteristics of traditional sea kayaks—such as glide, speed, and technical prowess—with the practical benefits of a sit-on-top design, including self-draining capabilities, enhanced safety, and ease of use. Perfect for hiking trips ranging from 1 to 3 days, it features a watertight compartment at the front and a spacious rear storage area designed to hold a 24-liter watertight container. Additionally, the rear space can accommodate a scuba diving tank, making the MID-WAY an excellent choice for adventure seekers.

Length: 440 cm/14'5" | **Width:** 65 cm/25.6" | **Depth:** 34 cm/13.4" | **Weight:** 23 kg/50.7 lb | **Max. Cap.:** 1 person | **Max. Charge:** 140 kg/308.7 lb

RTMKAYAKS.COM

RTM - TAIKI EVO

The TAIKI is the top choice among professionals for a single-seater kayak, renowned for its exceptional solidity, rigidity, and impressive navigational capabilities, even when fully loaded. This kayak offers the durability and performance that serious paddlers demand, making it a reliable companion on any water adventure.

Length: 345 cm/11'4" | Width: 80 cm/31.5" | Depth: 32 cm/12.6" | Weight: 23 kg/50.7 lb | Max capacity: 150 kg/330.7 lb

[RTMKAYAKS.COM](https://www.rtmkayaks.com)

RTM - TANGO EVO

The TANGO evolves into the TANGO EVO, featuring a redesigned deck, two integrated side handles, and a folding polyethylene backrest for enhanced comfort and convenience. Its innovative mobile polyethylene fins allow for easy stacking once lowered, with folders that automatically lower by dragging the kayak from back to front. Designed with a flat-bottomed, bowed hull, the TANGO EVO excels in rivers, lakes, and calm seas. It boasts a generous loading capacity and includes a spacious storage compartment, making it particularly well-suited for larger paddlers.

Length: 351 cm/11'6" | Width: 78 cm/30.7" | Depth: 34 cm/13.4" | Weight: 26 kg/57.3 lb | Max capacity: 140kg/ 308 lb | Max persons: 1

[RTMKAYAKS.COM](https://www.rtmkayaks.com)

RTM - MAKAO

The MAKAO sit-on-top kayak is designed to accommodate paddlers of all experience levels, offering a stable and comfortable ride. Featuring a folding polyethylene backrest, it allows paddlers to embark on everything from short discovery sessions to extended touring adventures. Whether you're navigating coastal waters, small waves, lakes, or rivers, the MAKAO is at home on any body of water, making it a versatile choice for every paddler.

Length: 273 cm/8'9" | Width: 79 cm/31.1" | Depth: 36 cm/14.2" | Weight: 22 kg/48.5 lb | Max capacity: 140kg/ 308 lb | Max persons: 1

[RTMKAYAKS.COM](https://www.rtmkayaks.com)

RTM - TEMPO

The TEMPO is a superb long-range cruiser, combining comfort, spaciousness, and speed for an exceptional paddling experience. Its well-braced bow and generous storage capacity make it ideal for fitness enthusiasts, extended trips, fishing, and diving adventures. Designed with larger paddlers in mind, the Tempo offers the perfect balance of performance and stability, ensuring that every journey is enjoyable and efficient.

Length: 450 cm/14'9" | Width: 67 cm/26.4" | Depth: 34 cm/13.4" | Weight: 24 kg/52.9 lb | Max capacity: 170kg/ 374.8 lb | Max persons: 1

[RTMKAYAKS.COM](https://www.rtmkayaks.com)

RTM - DISCO +

The DISCO + features a tapered design and streamlined glide, making it especially appealing to female kayakers. This self-draining model includes a stern storage space equipped with a deck net, capable of holding a watertight bag or canister (up to 24 liters). Designed specifically for paddlers weighing between 60 and 80 kg, the Disco + excels in rough seas, delivering a stable and enjoyable experience on the water.

Length: 428 cm/14'1" | Width: 65 cm/25.6" | Depth: 33 cm/13" | Weight: 23 kg/50.7 lb | Max capacity: 120kg/ 264 lb | Max persons: 1

SIT ON TOP 1

DESIGNED FOR FUN WITH FAMILY AND FRIENDS ON RIVERS, LAKES, AND OCEANS.

RIDGESIDE - BM-D001

The BM-D001 is designed for recreational paddling and light fishing, offering a stable and relaxed kayaking experience on calm or slow-moving waters. Its hull design ensures excellent stability and tracking, while multiple footrest positions accommodate paddlers of different sizes. Constructed from blow-molded high-density polyethylene (HDPE), the kayak is both durable and impact-resistant. Fixed buckles on both sides of the deck allow you to secure your paddle, freeing up your hands when needed. Molded carry handles and a center handle make transportation to and from the waterfront easy. With a comfortable backrest for long paddling adventures and a lightweight design, the BM-D001 is perfect for easy storage and transport.

Length: 254 cm/8'4" | Width: 74.9 cm/29.5" | Weight: 18.5 kg/40.8 lb | Max. Cap.: 110 kg/242 lb | Material: HDPE | Colors: Red . Orange . Blue . Green . Yellow

[RIDGESIDE-PADDLE.COM](https://ridgeside-paddle.com)

WILDERNESS SYSTEMS - TARGA 100

Perfect for day trips, the Targa 100 offers the right balance of comfort, stability and carefree spirit. The new sling-style seat is comfortable, breathable and adjustable. There is plenty of room to stretch out with a wide-open floor. Wilderness Systems even included a heel pad so you can kick back and relax. The hull is stable so you can paddle with confidence and ultimate ease wherever your adventures take you.

Length: 305 cm/10'0" | Width: 81 cm/32" | Weight: 28 kg/62 lb | Max. Cap.: 147 kg/325 lb | Colors: Mango . Galaxy . Breeze Blue . Purple Dawn

[CONFLUENCEOUTDOOR.COM](https://confluenceoutdoor.com)

PERCEPTION - TRIBE 9.5

Thanks to a new high-back frame seatback, the Tribe is now even more comfortable with increased support and cushioning. Plus, this new seatback takes relaxation to the next level offering infinitely adjustable recline positions, creating the ultimate lounge to kick back, relax and catch some rays while floating about. Lightweight and fully stackable, with a plethora of handles, getting this kayak to the water is a total breeze.

Length: 287 cm/9'5" | Width: 80 cm/31.5" | Weight: 22 kg/48.5 lb | Max. Cap.: 136 kg/300 lb | Colors: Sunset . Deja Vu . Dapper . Mystic

[CONFLUENCEOUTDOOR.COM](https://confluenceoutdoor.com)

PERCEPTION - HANGTIME 11.0

The Hangtime 11.0 offers a laid-back and fun on-water experience for you and your friends. Its unique design is completely focused on making the most of the experience once you arrive at your destination. A reclining seatback with a padded headrest and a large deck area offers a comfortable place to stretch out and enjoy company. With multiple drink holders and a padded lounge seat at the stern, the Hangtime 11.0 is the centerpiece of a memorable experience.

Length: 335 cm/11'0" | Width: 84 cm/33" | Weight: 31 kg/68 lb | Max. Cap.: 159 kg/350 lb | Colors: Sunset . Deja Vu . Dapper . Mystic

[CONFLUENCEOUTDOOR.COM](https://confluenceoutdoor.com)

PERCEPTION - HI FIVE 6.5

Designed for kids, the Hi Five kayak and SUP hybrid is perfect for lakes, ponds and calm coastal waters. It offers unique features like a swim-up deck, ample standing surface, paddle rest and easy-to-use carry handles. With its intentional "room to grow" design, the Hi Five will provide years of enjoyment. Comes with a kid-sized kayak paddle featuring smaller blades and decreased shaft diameter that is easier to grip with small hands.

Length: 183 cm/6'0" | Width: 61 cm/24" | Weight: 12 kg/26.5 lb | Max. Cap.: 54 kg/120 lb |
Colors: Sunset . Deja Vu . Mystic

PRIJON - TOURYAK 500

The Touryak 500 is the ultimate all-rounder for any adventure. Whether you're touring a calm river, exploring a large lake, or embarking on a paddling holiday in the Stockholm Archipelago, this boat is your go-to choice. Spacious, stable, and versatile, it features a modern hull with dished lateral sides for excellent initial and secondary stability while ensuring smooth performance. The roomy cockpit provides exceptional comfort, even for larger paddlers on extended trips. With large storage compartments, ample gear capacity, and durable HTP construction, the Touryak 500 is built for any challenge. Its 3D-touring thigh braces with padded surfaces enhance comfort while reducing weight, making it perfect for your next journey.

Length: 500 cm/16'5" | Width: 63 cm/24.8" | Weight: 28 kg/61.7 lb | Material: HTP (Blowmolded PE) | Colors: Yellow . Red . Blue

PRIJON.COM

VENTURE KAYAKS - FLEX

A lightweight, reassuringly stable, and easy-to-use kayak. As the name suggests, the Flex is designed for flexibility, allowing you to explore canals, take short coastal trips, enjoy a tranquil day on the lake, or float along gentle rivers—all in one kayak that's easy to paddle, transport, and store.

Length: 330 cm/10'8" | Width: 65 cm/25.6" | Weight: 23.5 kg/51.8 lb | Max. Cap.: 120 kg/264.6 lb | Material: MZ3 (HDPE) | Colors: Scarlet . Tahoe Blue | Sizes: One Size

[VENTUREKAYAKS.COM](http://venturekayaks.com)

VENTURE KAYAKS - ISLAY 12

The Islay is uncomplicated and encouragingly easy-going—choose the 12 for easier maneuverability and storage, or the 14 for a little more speed and range. An adventure touring kayak in an easily manageable size, the Islay 12 is perfect if you're progressing from a shorter, recreational kayak and want something with more speed and storage capacity for extended adventures, or if you're looking for a boat with the features of a longer touring kayak but with more maneuverability.

Length: 385 cm/12'8" | Width: 66 cm/26" | Weight: 25.5 kg/56.2 lb | Max. Cap.: 124 kg/273.4 lb | Material: MZ3 (HDPE) | Colors: Scarlet . Tahoe Blue | Sizes: One Size

[VENTUREKAYAKS.COM](http://venturekayaks.com)

VENTURE KAYAKS - ISLAY 14

The Islay is uncomplicated and encouragingly easy-going—choose the 14 for a little more speed and range, or the 12 for easier maneuverability and storage. A longer kayak is a faster kayak, allowing you to cover larger distances; the Islay 14 is an adventure touring kayak with a length similar to that of a sea kayak, but in a format that offers more stability and maneuverability. It's ideal for beginners and intermediates looking to try their hand at cozy weekend adventures and relaxed journeys of up to a week in length on canals, sheltered lakes, and gentle rivers.

Length: 427 cm/14'0" | Width: 60 cm/23.6" | Weight: 26 kg/57.3 lb | Max. Cap.: 130 kg/286.6 lb | Material: MZ3 (HDPE) | Colors: Scarlet . Tahoe Blue | Sizes: One Size

[VENTUREKAYAKS.COM](http://venturekayaks.com)

VENTURE KAYAKS - ISLAY CRUISER

Smile-inducing stability and performance. The Islay Cruiser features an extra-large, ultra-easy access cockpit and updated styling, paired with the refined performance of the Islay hull, making it as comfortable as it is functional. Hop in, lower yourself into the spacious cockpit using the grab handle, and settle into the luxuriously padded seat. The access and outfitting aren't the only things comfortable about the Islay Cruiser; ample stability will keep you focused on the sights and sounds around you, while great straight-line tracking, easy maneuverability, and a highly efficient hull combine for comfortable, almost effortless performance.

Length: 378 cm/12'5" | Width: 67 cm/26.4" | Weight: 25 kg/55.1 lb | Max. Cap.: 124 kg/273.4 lb | Material: MZ3 (HDPE) | Colors: Scarlet . Tahoe Blue | Sizes: One Size

[VENTUREKAYAKS.COM](http://venturekayaks.com)

DELSYK DESIGN - TUKTU

Unsinkable even when full, thanks to partitioned storage space and a buoyancy chamber, the Delsyk Tuktu boasts high initial stability and an ideal length-to-width ratio suitable for everyone—from calm water to light whitewater. The comfortable multi-bent frame shape, featuring a "Diamond Shape" and a moderate keel jump, enhances stability and safety, while the spacious seat hatch provides a sense of roominess. Fully equipped with legroom for paddlers up to 1.9 m and 120 kg in weight, the Tuktu ensures a relaxed and safe journey, whether on rivers, lakes, or weekend tours along the shore.

Length: 315 cm/10'4" | Width: 68 cm/26" | Weight: 19 kg/41.9 lb | Max. Cap.: 135 kg/298 lb | Material: HDPE | Colors: Orange . Lime . Red . Grey | Sizes: 149 . 162

DAGGER - AXIS 10.5

The Axis 10.5 crossover kayak offers impressive versatility, making it an ideal choice for paddling on lakes, reservoirs, intercoastal waterways, and ponds. Its height-adjustable drop skeg enables excellent tracking, ensuring the kayak moves straight. Whether planning a relaxing day trip on the lake or seeking adventure on running rivers, the Axis 10.5 is perfect and unmatched in its class. Experience the limitless capabilities of an "all-water" kayak with the Axis 10.5.

Length: 320 cm/10'5" | Width: 72 cm/28.5" | Weight: 23 kg/50 lb | Max. Cap.: 136 kg/300 lb | Colors: Red . Blue Mist . Green Mist

[DAGGER.COM](https://dagger.com)

DAGGER - KATANA 9.7

A crossover kayak that truly excels in any water. The Katana will take on rapids and glide through calm water, with plenty of room in the stern for gear and robust outfitting for everyday use. Reinforced hatches and a removable bow bulkhead offer unparalleled gear storage, while the drop skeg adds speed and stability. The 9.7 is perfect for smaller paddlers, or paddlers who do not need the added storage capacity of the larger model. Updated models now include our all-new Contour Ergo Engage Thigh Brace System, a modern update to Dagger's best-in-class Contour Ergo outfitting system, providing a more immersive paddling experience. Use the "Less" aggressive inner thigh hook for a relaxed fit or install the included "More" aggressive inner thigh hook for precise control and superior connectivity. Rotate the angle of your inner thigh hook and adjust the supportive outer hook to create individual fit and ultimate engagement with your Dagger kayak.

Length: 292 cm/9'7" | Width: 65 cm/25.75" | Weight: 23 kg/50 lb | Max. Cap.: 95 kg/210 lb | Colors: Red . Blue Smoke . Green Smoke

[DAGGER.COM](https://dagger.com)

ISLANDER KAYAKS - VORO S

A nimble little kayak that loves exploring. It's easy to paddle from the moment you first launch. Thanks to a stable hull, direction-assisting keel, and a flared bow—the Voro slips through the water. The oversized cockpit makes it easy to get afloat and lets you move around to get comfortable, with Cocoon seat padding for support. You'll love the neat details, like the solid handles, paddle rest, and rear storage shelf. The Voro S is also available in recycled material.

Length: 277 cm/9'1" | Width: 72 cm/28" | Height: 36 cm/14" | Weight: 17 kg/37 lb | Max. Cap.: 115 kg/254 lb | Material: High-Density Polyethylene | Colors: Coral . Reef . Citrus . Recycled

STABLE AND COMFORTABLE WITH A VERY LARGE COCKPIT OPENING FOR EASY ENTRY AND EXIT.

CARIBOU - ANTIA 490

Caribou Antia 490 is the next generation of sit-on-top kayaks. Antia was created keeping in mind ultimate stability and versatility. Its wide body and spacious deck are suitable for multiple-use scenarios - from family tours, and long fishing trips to guiding less skilled or even handicapped paddlers. The deck setting is fully adaptable to the needs of the crew - can be used solo, in tandem (or 2+2), or with three people. Carefully crafted nautical properties and its outstanding buoyancy make Antia a perfect choice that balances performance and safety. The Antia has two hatches and baggage compartments. Adjustable footrests and sliding, ergonomic frame seats with folding backrests. Extra seat for a child with soft foam cushion and various places to install inside the kayak. We provide also a version with an optional rudder or state-of-the-art MinnKota electric drive with GPS.

INFLATABLE 1

OFFERING MORE STABILITY THAN PLASTIC KAYAKS AND MAKING RIVER RUNNING ACCESSIBLE TO A WIDE VARIETY OF PADDLERS.

ZELGEAR - IGLA 490

The IGLA 490 hybrid inflatable kayak offers comfort, speed, lightness, and maneuverability—perfect for your next adventure. Its refined hull contours create a hydrodynamic form, allowing the IGLA to glide smoothly through the water. The kayak is composed of two parts: a twin side-tube hull for a slim profile and a removable, high-pressure drop-stitch floor with bow and stern stems for added rigidity and improved glide. Separate side tubes and the drop-stitch floor make post-trip cleaning and transport convenient, as the kayak can be divided into two parts. The side tubes are stacked vertically with an internal partition, enhancing longitudinal rigidity while keeping the kayak only 78 cm wide—making it one of the narrowest in its class without sacrificing internal space or stability.

Length: 490 cm/16'1" | Width: 78 cm/31" | Weight: 22 kg/49 lb | Max. Cap.: 260 kg/573 lb | Material: PVC | Colors: Red . Blue . Khaki . Black

JBAY.ZONE - NEON KAYAK

The Neon kayak with a Drop-Stitch bottom offers stability and safety on the water. Its flat bottom and rear stabilizing fin ensure good glide and maneuverability, resulting in excellent directionality. The adjustable seats allow you to find the most comfortable position inside the hull, enabling optimal paddling with minimal effort. The Drop-Stitch construction of the Neon kayak allows for higher pressure, enhancing stability and providing a solid platform for paddlers. Consequently, it significantly improves rigidity and weight support, comfortably accommodating two adults with a total weight capacity of 195 kg.

Length: 375 cm/12'3" | Width: 100 cm/39" | Weight: 13.7 kg/30.2 lb | Max. Cap.: 195 kg/429 lb | Material: Laminated PVC/PVC Dropstitch | Colors: Grey . Green . Fluo Green

NRS - PULSAR PACKRAFT

Packrafts open the door to a wide range of paddling possibilities, allowing the adventure-minded paddler to go nearly anywhere and paddle waters previously unattainable. Designed with ultimate packability and robust reliability in mind, the NRS Pulsar Packraft uses PVC-free nylon with an internal and external TPU coating for lightweight and durable construction that is easy to repair and maintain. Overlapping, heat-welded seams create an incredibly strong mechanical bond for fail-proof air retention. For multi-day missions or longer paddles, the Pulsar's TIZIP® stern closure creates a fully waterproof, easily accessible storage space with two internal lash tabs for keeping your gear secure. The Pulsar is available in standard and XL sizes.

AQUADESIGN - RIVER TPU 230

The RIVER TPU 230 Packraft is a fully decked packraft designed for river use and capable of handling up to Class IV rapids. Its 100% TPU construction is also 100% recyclable. Its deck ensures that you stay dry in all conditions. But that's not all, as its Velcro® hatch positioned at the front of the deck provides access to the area between your legs and allows you to securely store your backpack, keeping your belongings safe from moisture during your adventure. The folded and packed packraft weighs only 5 kg, making it incredibly easy to transport and store. This packraft has two separate inflation compartments, making it twice as safe as a traditional packraft without being more cumbersome. Made with high-quality materials, the tube is constructed from 210D TPU, and the robust bottom is made of 420D TPU. 100% recyclable and repairable.

Length: 230 cm/7'5" | Width: 90 cm/ 35" | Weight: 5 kg/11 lb | Max. Cap.: 160 kg/353 lb |

AQUADESIGN.EU

KOKOPELLI - ROGUE R-DECK

The Rogue is the most versatile and best-selling packraft. Weighing in at only 4 kg, and packing down to the size of a (large) roll of paper towels, it's become the standard for portability and durability. The Kevlar reinforced floor system for increased durability on the water and the 210 D TPU + Nylon sidewalls are the perfect combination of strength and weight. There are extra reinforcements in high-wear areas and a removable spraydeck. Rated up to Class II rivers, the Rogue R-Deck is now THE packraft for bikepacking, backpacking, high-alpine lakes, fishing, climbing, travel, whatever you can throw at it, wherever you can throw it.

Length: 229cm/7'5" | Width: 94 cm/36" | Weight: 3.6 kg/7.9 lb | Max. Cap.: 100kg/220 lb |
Material: 210 D Nylon TPU | Colors: Smoke Blue .Yellow

PADDLE-PEOPLE.COM

NORTIK - LIGHTRAFT

At just 2.1 kg, the LightRaft is a packraft for true weight optimizers and minimalists. However, this does not mean you have to sacrifice maximum fun on the water—on the contrary! This small and agile raft is a valuable addition to the Nortik packraft family. The "little savage" packs into a sack that is closer in size to a toiletry bag than a typical packraft bag. The LightRaft truly fits anywhere, making it easy to take along on any adventure. The extremely light yet highly durable (double-sided coated!) high-performance TPU and the high-quality construction match those of other Nortik rafts. If the small version is enough for you, maximize your fun immediately with this minimalist packraft from Nortik!

Length: 180 cm/5'9" | Width: 91 cm//33" | Weight: 2.2 kg/4.8 lb | Max. Cap.: 115 kg/253 lb |
Material: TPU | Colors: Orange . Dark Olive | Pack Size: 40x15 cm/16"x6" | Seats: 1

FALTBOOT.DE

NORTIK - TREKRAFT EXPEDITION WITH DECK

The TrekRaft Expedition by Nortik revolutionizes TrekRaftering, a combination of trekking and paddling. Weighing just 3.8 kg and featuring an ultra-compact pack size, it fits into any rucksack. As an affordable, high-performance packraft, it expands this fascinating sport for an ambitious audience. High-performance ultralight TPU, air tubes coated on both sides, and an extra-reinforced bottom ensure quality and durability while maintaining the lowest possible weight and pack size. Versatile in use, it enables not only river and lake crossings during a hike but also whitewater fun up to Class III. The Nortik TrekRaft Expedition enhances the range with an innovative expedition line that includes luggage stowage options in the air tube. This lowers the center of gravity, reduces wind exposure, and offers additional safety as a buoyancy chamber. Numerous well-known expeditions have already taken advantage of these benefits.

Length: 230 cm/7'5" | Width: 92 cm/36" | Weight: 3.7 kg/8.1 lb | Max. Cap.: 150 kg/330 lb |
Material: TPU | Colors: Yellow/Black | Pack Size: 50x25 cm/20"x10" | Seats: 1

FALTBOOT.DE

FOLDABLE 1

BOATS DESIGNED TO PACK DOWN FOR EASY TRANSPORT AND STORAGE.

NORTIK - ARGO 1

The Nortik Argo, named after Argonauts' fast ship from Greek mythology, is a versatile touring kayak. As a large tourer, it offers sportiness, stability and robustness. At 5.20 meters long and 62 cm wide, the Argo offers more volume, even for stronger paddlers. The robust PVC/PU skin, the pre-installed keel strip and the anodized aluminum frame make the boat durable and lightweight at just 19 kg. The equipment includes hatch covers, thigh braces, a hanging seat, deck lining and repair kit, all in one backpack. Optional extras include a steering system, footrests, a thermal PU skirt and sea sock for safety and cleanliness. The Argo is not only fast but also stable and is equally ideal for ambitious beginners and advanced paddlers with big plans. Its robustness and safety have already proven themselves on various expeditions around the globe.

Length: 520 cm/17'0" | **Width:** 62 cm/24" | **Weight:** 19 kg/41 lb | **Max. Cap.:** 160 kg/352 lb | **Material:** Skin: PVC/PU mix . **Frame:** Anodized Aluminum | **Colors:** Red/Black . Grey/Black | **Pack Size:** 120x45x25 cm/47"x18"x10" | **Seats:** 1

[FALTBOOT.DE](https://faltboot.de)

TRITON ADVANCED - LADOGA 1 ADVANCED

The Ladoga 1 Advanced, a multiple winner in benchmark tests by several leading magazines, impresses with its outstanding rigidity and sea kayak characteristics. With a length of 490 cm, it is a stable all-rounder, perfect for rivers, lakes, and coasts. The removable deck makes loading easier, while a watertight hatch in the bow optimizes luggage management. The design with five ribs, a full-length keel, and side air tubes ensures stability and directional control. The Ladoga 1 Advanced offers sufficient luggage space for longer trips and can be stowed compactly in a backpack. The complete set (incl. backpack, steering system, and repair kit) is available at an unbeatable price-performance ratio. Optional sails and other accessories are available.

Length: 490 cm/16'0" | **Width:** 65 cm/25" | **Weight:** 17.5 kg/38.5 lb | **Max. Cap.:** 150 kg/330 lb | **Material:** Skin: PVC/PU mix . **Frame:** Anodized Aluminum | **Colors:** Red/Black | **Pack Size:** 120x48x20 cm/47"x19"x8" | **Seats:** 1

[FALTBOOT.DE](https://faltboot.de)

PAKBOATS - QUEST 150

Pakboats has achieved impressive success with the Quest 150: a rigid construction with a fast setup, good handling characteristics and a weight of only 14.1 kg! The extremely light and robust PU skin material and the gold anodized aluminium frame, which has been reduced to a minimum, contribute to this. The included PU-coated canopy allows the use of a skirt, but can also be paddled open. With its sporty shape, the Quest 150 is designed for touring paddling, but also includes the recreational aspect of the Puffins and impresses with its compact pack size, quick assembly and light weight. The ideal boat for ambitious paddlers, always ready for spontaneous adventures. And all in a sports bag format!!

Length: 455 cm/15'0" | **Width:** 61 cm/24" | **Weight:** 14 kg/31 lb | **Max. Cap.:** 130 kg/286 lb | **Material:** Skin: PU . **Frame:** Anodized Aluminum | **Colors:** Yellow/Black . Blue/Black | **Pack Size:** 75x40x30 cm/29.5"x16"x12" | **Seats:** 1

[FALTBOOT.DE](https://faltboot.de)

NORTIK - NAVIGATOR

The Navigator, an innovative wooden-frame kayak, redefines standards. Weighing just 22 kg, it folds into a backpack, featuring a unique hull design using white ash and birch plywood. This aims at both professionals and beginners, with high stability and flexibility. A bent frame in the bottom provides initial stability, while the round frame rib in the walls ensures final stability. Side air tubes provide additional protection and enable a flexible skin construction. The PVC/PU skin material is UV-resistant and hard-wearing. The clever fitting technology, inspired by bionics and patent-protected solutions such as the board wall hinge, allows a compact pack size. Stainless steel fittings without snap fasteners ensure simple assembly and robustness. On the water, the Navigator demonstrates impressive stability and safety despite its narrower width compared to conventional folding boats. It is fully equipped with keel strips, cover hatches, thigh supports and a backpack.

Length: 505 cm/16'5" | **Width:** 58 cm/23" | **Weight:** 22 kg/48.5 lb | **Max. Cap.:** 150 kg/330 lb | **Material:** Skin: PVC/PU mix . **Frame:** Wood | **Colors:** Red/Black | **Pack Size:** 115x40x20 cm/45"x16"x8" | **Seats:** 1

JACKSON KAYAK - 360 ANGLER

The 360° Angler is tailored for anglers who demand a fishing kayak that excels in every aspect. It prioritizes ample space, comfort, accessories, and storage without sacrificing the stealth and maneuverability needed for accessing shallow waters that larger boats can't reach. Combining the stability of a bass boat with the convenience of a kayak, the 360° Angler offers a comprehensive fishing experience and features our Flex Drive Mark IV. Ideal for fishing on large lakes, ponds, and inshore saltwater, the 360° Angler also features integrated wheels for easy transport from your truck to the boat launch. Its dual hull design ensures remarkable stability even in rough waters.

Length: 419 cm/13'9" | Width: 94 cm/37" | Weight: 62.6 kg/138 lb | Weight with Seat: 65.8 kg/145 lb | Weight With Seat & Drive: 71.7 kg/158 lb | Capacity: 192 kg/425 lb

[JACKSONKAYAK.COM](https://www.jacksonkayak.com)

VIBE KAYAKS - MAKANA 100

The Makana 100 is a 10'0" pedal-driven kayak, expertly designed with Vibe's industry-leading Impulse Drive or X-Drive pedal system. Renowned for its stability and maneuverability, it features a Vibe rudder and steering handle for effortless turns, allowing anglers to explore every nook of their favorite lake. Ideal for all-day adventures, the Makana 100 has quickly become a favorite among pros. Its compatibility with both the Impulse Drive and X-Drive systems offers versatility—easily switch out the pod to customize your kayaking experience. Packed with features, the Makana 100 is the ultimate choice for adventure-seekers and fishing enthusiasts alike.

Length: 304 cm/10'0" | Width: 89 cm/35" | Height: 35 cm/14" | Weight: 40 kg/88 lb | Max. Cap.: 181 kg/400 lb | Material: HDPE Plastic | Colors: Tsunami Red . Slate Blue . Galaxy Raven

[VIBEKAYAKS.COM](https://www.vibekayaks.com)

RTM - HIRO IMPULSE DRIVE

The HIRO Impulse Drive is a kayak featuring a slim, stable, and ergonomic design that enables hands-free fishing. Powered by the lightweight Impulse Drive system, this kayak allows for both forward and backward movement. Steering is facilitated by a wide rudder controlled by a joystick located on the port side. The comfortable premium seat adjusts to accommodate the size of the fisherman, while the spacious platform in front of the seat provides ample room for fishing while standing.

Length: 362 cm/11'9" | Width: 87 cm/34.3" | Depth: 40 cm/15.7" | Weight: 42 kg/92.6 lb | Max Persons: 1 | Max Capacity: 180 kg/398 lb

JACKSON KAYAK - COOSA X

Jackson Kayak continues to evolve its river fishing offerings with the latest iteration of the Coosa line. Drawing on our expertise in hull design for dynamic water conditions and collaborating closely with our fishing team, we're proud to introduce the Coosa X, a true JK Team Signature Watercraft. This kayak is characterized by its stability, maneuverability, easy rigging options, and a host of new and innovative features. The Coosa X is your go-to kayak for a range of adventures, from river trips and kayak camping to river fishing, exploring small lakes and ponds, or navigating narrow creeks and tributaries.

Length: 356 cm/11'8" | Width: 91 cm/36" | Weight: 42.6 kg/94 lb | Weight With Seat: 46.3 kg/102 lb | Capacity: 193 kg/425 lb

[JACKSONKAYAK.COM](https://jacksonkayak.com)

PERCEPTION - OUTLAW 11.5

The Outlaw 11.5 boasts a wide-open deck, expansive standing platform, elevated seating and intuitive features throughout, disrupting the notion that an incredibly unique fishing kayak needs to break the bank. The Outlaw integrates innovative features, including a stowaway seat for deck walkability and space for a 35-liter cooler. Two double-barrel rod holders offer the ultimate four-rod setup and elevated seating offers an ideal fishing vantage. There is also a transducer scupper on the hull.

Length: 351 cm/11'6" | Width: 89 cm/35" | Weight: 35 kg/77 lb | Max. Cap.: 193 kg/425 lb | Colors: Moss Camo . Dapper . Fossil Tan . Purple Camo

[CONFLUENCEOUTDOOR.COM](https://confluenceoutdoor.com)

PERCEPTION - PESCADOR PRO 12.0

Cruise, explore and fish with kayaking's most well-rounded performer. The Pescador 12.0 fishing kayak's versatility makes it popular for both recreational paddlers and anglers. Extreme stability ensures a drier ride that's easier to get in and out of. The 375 lb capacity rating packed into a 12' kayak means plenty of room for you and your gear. Compared to its shorter sibling, the longer length adds speed, storage, and stability. Multiple storage options, fish-ready features, and an incredibly comfortable seat keep you on the water for longer.

Length: 366 cm/12'0" | Width: 83 cm/32.5" | Weight: 29 kg/64 lb | Max. Cap.: 170 kg/375 lb | Colors: Fossil Tan . Purple Camo . Moss Camo . Dapper

[CONFLUENCEOUTDOOR.COM](https://confluenceoutdoor.com)

PERCEPTION - PESCADOR 10.0

A terrific all-around sit-on-top kayak for lakes, ponds and surf. At only 10'5", this kayak is easy to transport but still stable enough for larger paddlers. A high performance, feature rich boat at a great value.

Length: 320 cm/10'6" | Width: 81 cm/32" | Weight: 24 kg/52 lb | Max. Cap.: 147 kg/325 lb | Colors: Moss Camo . Dapper

[CONFLUENCEOUTDOOR.COM](https://confluenceoutdoor.com)

PELICAN - S.E.E.K. 100XP

Colors: Outback . Forest Mist . Tangerine . Venoms

[CONFLUENCEOUTDOOR.COM](https://confluenceoutdoor.com)

PELICAN - SENTINEL 100X

The SENTINEL 100X ANGLER is specifically designed for the experienced angler looking to try kayak fishing. Measuring 9.5" and weighing only 44 pounds, the SENTINEL 100X ANGLER is easy to transport and store. A multi-chine flat bottom hull ensures the stability needed when casting lines and reeling in fish. Plus, this hull is designed to perform like a longer kayak, with improved speed and tracking, while maintaining the agility you'll need for those tight spots.

Length: 290 cm/9'5" | Width: 76 cm/30" | Height: 34 cm/13.25" | Weight: 20 kg/44 lb | Max capacity: 125 kg/275 lb | Colors: Fade Black Green . Granite . Forest Mist

[CONFLUENCEOUTDOOR.COM](https://confluenceoutdoor.com)

PELICAN - SENTINEL 100XP

The Sentinel 100XP Angler fishing kayak features molded footrests, a smartphone holder with bungee cords and paddle ties to keep your hands free when needed. In addition to the usual components, this sit-on-top kayak is equipped with practical fishing add-ons such as 4-inch rigging tracks to install accessories and 2 recessed rod holders. Explore the less crowded fishing spots aboard this sit-on-top kayak, perfect for lovers of the great outdoors.

Length: 305 cm/10'0" | Width: 79 cm/31" | Height: 30 cm/11" | Weight: 20 kg/44 lb | Max capacity: 136 kg/300 lb | Colors: Venom . Borealis . Garnet . Iris

LETTMANN - SKAGERRAK

If you want to be on the safe side, need a particularly large cockpit, or require ample room for your thighs and larger feet, the Skagerrak is the perfect choice! This kayak also provides plenty of storage space for expeditions and long journeys away from civilization. Its good-natured yet fast hull conveys a sense of security and control without resembling a cargo ship. Despite its larger volume, the Skagerrak remains a sporty sea kayak designed specifically for bigger paddlers.

Length: 555 cm/18'3" | **Width:** 58-58.5 cm/22.8"-23" | **Weight:** 23-28 kg/50.7-61.7 lb | **Max. Cap.:** 70-130 kg/154-287 lb | **Material:** Composite DCS, LCS, VCS | **Colors:** Full RAL Color Scheme | **Sizes:** 90 . 110

[LETTMANN.DE](https://lettmann.de)

LETTMANN - BISKAYA 75/85

Since 2011, the Biskaya has been the athlete among our sea kayaks. This particularly fast and slim kayak is highly maneuverable and agile, especially when utilizing the edge—a feat that remains effortless thanks to its slim, strongly rounded U-frame. The new Biskaya is now available in four sizes instead of three, presenting itself as a sporty all-rounder. The second generation features slightly optimized directional stability, which enhances performance on long tours and journeys without compromising agility. Additionally, the stern has been slightly raised, positively impacting surfing and navigating through breaking waves.

Length: 540 cm/17'9" | Width: 53.5-54 cm/21.1-21.3" | Weight: 21-26 kg/46.3-57.3 lb | Max. Cap.: 60-100 kg/132-220 lb | Material: Composite DCS, LCS, VCS | Colors: Full RAL Color Scheme | Sizes: 75 . 85

LETTMANN.DE

LETTMANN - BISKAYA 80/90

The Biskaya has been the athlete among our sea kayaks since 2011. This particularly fast and slim kayak is maneuverable and highly agile, especially when utilizing the edge—a task that remains easy thanks to the slim, strongly rounded U-frame. The new Biskaya is now available in four sizes instead of three, presenting itself as a sporty all-rounder more than ever. The second generation features slightly optimized directional stability, enhancing performance on long tours and journeys without sacrificing agility. Additionally, the stern has been slightly raised, which positively impacts surfing and navigating through breaking waves.

LETTMANN - ADRIA

Small but mighty, the compact Adria spans five meters in length and initially presents as a modest blend of sea and touring kayaks. However, its excellent directional stability, safe hull, and raised stern reveal its true nature—a clever companion that excels in heavy seas, wind, and waves. With the Adria, you can maintain control effortlessly. It guides you lightly to your personal comfort zone, providing security even when you push beyond it.

Length: 500 cm/16'5" | Width: 58 cm/22.4"-22.8" | Weight: 20-25 kg/44.1-55.1 lb | Max. Cap.: 140 kg/308.6 lb | Material: Composite DCS, LCS, VCS | Colors: Full RAL Color Scheme | Sizes: 65 . 80

LETTMANN.DE

LETTMANN - AKAROA

The Akaroa is the ideal travel boat for those who prefer a leisurely pace over racing against the clock. Its excellent directional stability, combined with a safe yet agile hull, ensures you remain relaxed on your journey while still having the reserves to handle unexpected elements. Among our sea kayaks, none are as neutral in wind and waves, staying unfazed even in strong breezes from behind or the side. The slightly wider, flatter, and more angular bottom enhances the fun in surfing. Additionally, the raised stern allows the Akaroa to stay dry even in long surf waves—a true pleasure!

Length: 525 cm/17'3" | Width: 57-58 cm/22.4"-22.8" | Weight: 21-26 kg/46.3-57.3 lb | Max. Cap.: 50-100 kg/110-220 lb | Material: Composite DCS, LCS, VCS | Colors: Full RAL Color Scheme | Sizes: 65 . 80 . 95

LETTMANN.DE

LETTMANN - BISKAYA 55/65

Since 2011, the Biskaya has been the athlete among our sea kayaks. This particularly fast and slim kayak is highly maneuverable and agile, especially when utilizing the edge—something that remains effortless thanks to its slim, strongly rounded U-frame. The new Biskaya, now available in four sizes instead of three, presents itself as a sporty all-rounder. The second generation features slightly optimized directional stability, enhancing performance on long tours and journeys without compromising agility. Additionally, the sterns have been slightly raised, positively impacting surfing and navigating through breaking waves.

Length: 533 cm/17'6" | Width: 51.5-52 cm/20.3-20.5" | Weight: 19-24 kg/41.9-52.9 lb | Max. Cap.: 40-80 kg/88-176 lb | Material: Composite DCS, LCS, VCS | Colors: Full RAL Color Scheme | Sizes: 55 . 65

LETTMANN.DE

P&H SEA KAYAKS - CETUS

Perhaps the best-selling composite sea kayak ever made, the Cetus is the ultimate expedition platform. It features a shallow "V" hull and large, rounded chines that smoothly transition into a slender bow and stern, allowing it to track well and cover distance comfortably. At the same time, it can swing around nimbly on edge, all while being remarkably stable no matter what the ocean throws at you.

Length: 541 cm/17'9" | Width: 54.5 cm/21.5" | Weight: 25 kg/55.1 lb | Max. Cap.: 115 kg/253.5 lb | Material: Expedition Kevlar/Carbon Infusion | Colors: Custom | Sizes: LV . MV . HV

PHSEAKAYAKS.COM

P&H SEA KAYAKS - VARIES

A now-iconic, ocean-play sea kayak design, truly built for purpose. The planing hull is highly maneuverable, reassuringly stable, and ideal for use in the surf. The high-volume bow with pronounced rocker, combined with a set-back cockpit position, prevents the Aries from purling and allows you to ride the wave all the way into shore.

Length: 485 cm/15'9" | Width: 57 cm/22.4" | Weight: 22 kg/48.5 lb | Max. Cap.: 125 kg/275.6 lb | Material: Lightweight Kevlar/Carbon Infusion | Colors: Custom | Sizes: 150 . 155

P&H SEA KAYAKS - COMPOSITE VIRGO

P&H's best-selling sea kayak is now available in composite! The Composite Virgo takes P&H's top-seller of the last two years and makes it even better: more responsive on the water, more efficient, and weighing as little as 16kg. It's an easy choice for anyone looking to upgrade from a plastic Virgo or jump straight into composite with a design they can trust.

Length: 449 cm/14'9" | Width: 58 cm/22.8" | Weight: 24 kg/52.9 lb | Max. Cap.: 110 kg/242.5 lb | Material: Classic Diolen | Colors: Signal Red . Anchusa Blue . Orange | Sizes: One Size

PHSEAKAYAKS.COM

P&H SEA KAYAKS - VOLAN

The ultimate lightweight, highly versatile day/weekend sea kayak—now even lighter in Ultralight! The Volan is built specifically for those who want to make the most of day and weekend trips. It tracks straight when flat but swings effortlessly when on edge or carving into a turn, offering comfortable performance for both the journey and any play spots you find along the way. Its short, 16'0" length provides ample hull speed for most adventures while keeping weight to an absolute minimum for nimble performance and easy handling.

Length: 489 cm/16'1" | Width: 58 cm/22.8" | Weight: 16 kg/35.2 lb | Max. Cap.: 110 kg/242.5 lb | Material: Ultralight Kevlar/Carbon Infusion | Colors: Custom | Sizes: 156 . 158 . 160 . 162

PHSEAKAYAKS.COM

K2 COMPOSITE

MADE FROM A COMBINATION OF CARBON, KEVLAR AND FIBERGLASS, THEY ARE LIGHTER THAN THEIR PLASTIC COUNTERPARTS BUT LESS DURABLE IN THE EVENT OF IMPACT.

PRIJON - YUKON K2 SPORT

The Yukon K2 Sport is the ideal kayak for long tours on open waters. This elegant, stable, and fast double-seater glides effortlessly through the water, ensuring a safe and enjoyable journey. It features large, watertight storage compartments and a convenient day hatch, providing ample space for your gear. Additional mounting options on the deck allow for extra storage with deck bags. Weighing just 25 or 29 kg, depending on the configuration, the Yukon K2 Sport is one of the lightest boats in its class, making it a perfect choice for extended adventures.

Length: 546 cm/17'11" | Width: 68 cm/26.8" | Weight: 25 kg/55.1 lb | Material: GRP/Carbon-Aramid | Colors: Yellow . Red . Blue . Orange . Black . Green

Ideal for paddlers up to 120 kg, it delivers durable performance for both short and long tours, handling rough conditions with ease while paddling effortlessly on calm days. The Seatron GT features a modern, narrower hull with a distinct rocker, enabling excellent forward speed and stability. Perfect for open water crossings, wave surfing, and extended multi-day trips, it offers high stability and maneuverability, even in challenging sea conditions. The progressive hull design with a medium rocker lets you paddle fast and straight or edge the kayak for better control. It excels at surfing following waves, making it responsive and effortless to manage.

NOVA CRAFT - PROSPECTOR 14 SOLO

Our most versatile solo canoe model yet is a scaled-down version of our popular Prospector design, ideal for independent backcountry adventures. The Prospector 14'0" Solo features a symmetrical hull with moderate rocker for responsive performance. It is more efficient on flat water than its tandem counterparts while maintaining the capacity expected from a Prospector. Our wooden bench seat can be ordered flat or angled, depending on your preference. For backcountry tripping, we recommend adding the removable yoke option for ease of use on the portage trail.

Length: 427 cm/14'0" | **Width:** 81.3 cm/32" | **Weight:** 15.9 kg/35 lb | **Center Depth:** 34.3 cm/13.5" | **End Depth:** 54.6 cm/21.5" | **Rocker:** 6.4 cm/2.5" | **Capacity:** 249 kg/550 lb | **Material:** Aramid Lite | **Colors:** Clear .Tinted Color Options Available

INFLATABLE

CANOEES THAT CAN BE EASILY PACKED AND STORED FOR CONVENIENCE AND PORTABILITY

WTX - RAPID FIRE

The Rapid Fire is a unique, compact, inflatable whitewater canoe designed for up to Class IV rapids. This lightweight, self-draining canoe for two is highly maneuverable and easy to balance with adjustable seating positions, without the need for screws or strings. The boat's innovative hull features varying cylinder thicknesses for speed and control, while the absence of top seams on the side cylinders ensures comfort while paddling. With four strap handles on the sides and additional handles at the bow and stern, it's easy to carry or pull. A unique solution secures the pump to the stern, and ropes at both ends provide tie-off points for transport or docking. Lightweight and easy to pack, it can be carried as a bag or backpack. The Rapid Fire is the world's sportiest whitewater inflatable canoe and the winning boat of the Czech Paddlers Cup 2024.

Length: 360 cm/11'8" | Width: 105 cm/41" | Weight: 16 kg/35 lb | Max capacity: 200-250 kg/440-550 lb | Packed Boat: 65x40x35 cm/26"x16"x14" (approx.) | Difficulty: Up to WW IV | Max persons: 2 person | Air Chambers: 3 | Material: Valmex Lite | Colors: Orange . Lite Green . Lite Blue . Combination

VERANO WATERSPORTS - CANCAN 16 NEO

The Verano CanCan 16 Neo is an inflatable canoe designed for family adventures, representing the latest generation of drop-stitch canoes. It offers the same stiffness, durability, and resistance as previous models, but with reduced weight and a smaller pack size. The updated Neo version features soft, rubber-reinforced end caps for added flexibility. Equipped with four benches, it provides ample seating and storage space. Its versatile seating system allows it to be configured with 2, 3, or 4 benches, making it adaptable for various group sizes. With two benches, it can handle multi-day trips with camping gear, while with three or four benches, it becomes the perfect companion for family outings.

Length: 488 cm/16'0" | Width: 90 cm/35.4" | Weight: 26.8 kg/59.1 lb | Max. Cap.: 400 kg/880 lb | Material: Drop-Stitch Fusion PVC | Colors: Dark Green

AQUA MARINA - TOMAHAWK AIR-C

Ready to go the distance! The TOMAHAWK AIR-C combines stunning modern design with top-tier performance. This revolutionary inflatable canoe is 40% lighter than traditional hard-shell canoes, offering exceptional portability without compromising functionality. Ideal for long-distance treks, its large loading capacity comfortably accommodates 2 to 3 people with ample room for gear. Designed for explorers, the ultra-stable, rigid long waterline ensures excellent tracking, enhanced by molded keels. Upgraded features include anti-skid benches and a drop-stitch cushion for unparalleled comfort during paddling. This versatile 2-3 person canoe is adventure-ready straight out of the box!

Length: 527 cm/17'3" | Width: 95 cm/37.4" | Weight: 44 kg/97 lb | Max.Cap.: 490 kg/1028 lb

[AQUAMARINA.COM](https://www.aquamarina.com)

GRABNER - ADVENTURE EXPEDITION

The ADVENTURE EXPEDITION's long waterline ensures smooth glide and excellent tracking. Its wide-bottom construction provides stability, even on moving rivers. The spacious interior comfortably accommodates three people and gear, making it ideal for families with children. It rolls up compactly to fit into a 65x40x25 cm backpack. High-quality stainless-steel eyelets allow for secure equipment attachment.

Length: 450 cm/14'9" | Width: 95 cm/37" | Weight: 26 kg/56 lb | Max. Cap.: 450 kg/992 lb | Material: EPDM Rubber | Colors: Red/Black

MID RANGE

STABLE DESIGN AND MEDIUM RANGE CONSTRUCTION MAKE THESE CANOES PERFECT FOR TOURING ON LAKES AND EASY RIVERS.

ROTO ATTIVO - CANADIER 2

A classic canoe designed for leisure, the Canadier 2 excels in various environments, including the sea, lakes, and calm rivers. Its stability and versatility make it ideal for a wide range of activities. Constructed from a 3-layer recycled polyethylene (a mix of recycled plastic and waste wood shavings), the inner layer provides rigidity to the hull, making it unsinkable, while the outer layers protect the foam from impacts. By combining recycled plastic with waste wood, we've created a durable and eco-friendly product that boasts a modern and elegant appearance.

Length: 455 cm/14'9" | Width: 90 cm/35.4" | Weight: 43 kg/94.7 lb | Max. Cap.: 250 kg/551 lb | Material: CoreLite (Foam Core HDPE) | Colors: Dark Brown | Sizes: 149 . 162

ROTOATTIVO.EU

LETTMANN - TRAPPER

Our open canoes from the Trapper series are popular for their high tilt stability. The long waterline allows for a fast pace and excellent directional stability. The rails at the bottom enhance the canoe's guidance, keeping the Trapper on course even in moving water. With a robust construction of PE, the Trapper is extremely durable and easy to maintain. Its three-layer design, consisting of two layers of PE and an inner foam layer, provides insulation, stiffness, and makes it unsinkable. It is the perfect canoe for families, beginners, and touring paddlers with a lot of luggage. The bulbous bottom can bear a significant load, ensuring stability even when the maximum capacity is reached. Thanks to its sturdy construction and ease of handling, the Trapper is also a favorite among rental services.

Length: 450-518 cm/14'7"-16'9" | Width: 95-97 cm/37"-38" | Weight: 39-50 kg/86.2-110.2 lb | Max. Cap.: 330-400 kg/727-882 lb | Material: Superlinear HDPE | Colors: Green . Red . Blue | Sizes: 450 . 490 . 518

ARCTIC WATERSPORT - UPPER CANADA 16

The Upper Canada 16 is an incredibly versatile all-round canoe, offering agility, stability, and ease of handling for exploring rivers and lakes. It remains stable even in larger waves, thanks to its special 3-layer sandwich polyethylene construction, which ensures a stiff, lightweight, and durable hull that's also unsinkable. Standard features include two webbed ash seats, wooden handles, vinyl gunwales, and a carry yoke. Optional upgrades include a third seat, a kneeling thwart, an additional thwart for accessory attachment, and a curved seat.

Length: 485 cm/15'9" | Width: 88 cm/34.6" | Weight: 36 kg/79.3 lb | Material: Polyethylene sandwich

[ARTICWATERSPORT.FI](http://articwatersport.fi)

NOVA CRAFT - PROSPECTOR 16 SP5

Our SP3 canoe models share the same performance characteristics as our renowned Prospector models but are constructed from a durable three-layer polyethylene plastic known as SP3. This nearly indestructible material is designed to withstand hard knocks and extensive use, making these canoes appealing to owners who anticipate heavy use with minimal maintenance. While SP3 canoes are our heaviest boats, they are also the most affordable in our lineup. These canoes are ideal for liveries and rental shops, offering many years of reliable service at an attractive price.

Length: 479 cm/15'7" | Width: 91.5 cm/36" | Weight: 43 kg/94 lb | Center Depth: 36 cm/14.5" | End Depth: 58 cm/23" | Rocker: 8 cm/3" | Capacity: 408 kg/900 lb | Material: Sp3 | Colors: Green . Red . Blue . Yellow . Orange

CREEKING

HIGH STABILITY WHITEWATER KAYAKS DESIGNED SPECIFICALLY FOR RUNNING RIVERS AND STEEP CREEKS.

PYRANHA - MACHNO

A tried and tested design that'll make you feel like a hero. When you're in the Machno, it'll almost feel as though time slows down as you glide into the rapids, waiting for the perfect moment to plant those key paddle strokes and nail that boof.

Length: 265 cm/8'8" | Width: 66.5 cm/26.2" | Weight: 21 kg/46.3 lb | Max. Cap.: 100 kg/220.5 lb | Material: MZ3 (HDPE) | Colors: Red . Teal | Sizes: S . M . L

[PYRANHA.COM](https://pyranha.com)

PRIJON - RIZZ

The RIZZ radiates vibrant energy and a bold style! This medium-volume creeker is a slightly smaller, more agile counterpart to the BEAST. With modified edges on the lower hull and a narrower width, the RIZZ is designed for greater maneuverability when edging and faster acceleration. The new rocker line in the bow and a slightly flatter hull provide impressive speed, letting it glide effortlessly over holes and drops. Wave deflectors, tested on the BEAST, ensure it runs completely dry through waves. Additional volume behind the cockpit boosts buoyancy when edging, enhancing safety in whitewater. These features make the RIZZ perfect for paddlers seeking full performance with slightly reduced volume. The PR-X foam seating system, paired with our virtually indestructible HTP hull, delivers an exceptionally lightweight, durable design.

Length: 268 cm/8'9" | Width: 66 cm/26" | Weight: 20 kg/44 lb | Material: HTP (Blowmolded PE) | Colors: Turquoise . Neon Yellow . Pink

[PRIJON.COM](https://prijon.com)

PYRANHA - REACTR

Embrace the new era of whitewater kayaking! Ride higher and drier through rapids, dart into eddies with unprecedented speed, and navigate your line without limits. The Reactr is Pyranha's most innovative design yet, opening new possibilities in creek and river running for kayakers of all skill levels.

Length: 273 cm/8'9" | Width: 70 cm/27.6" | Weight: 23 kg/50.7 lb | Max. Cap.: 95 kg/209.4 lb | Material: MZ3 (HDPE) | Colors: Rosella Red . Cotinga Blue | Sizes: S . M . L

[PYRANHA.COM](https://pyranha.com)

PRIJON - BEAST

High-volume, new-generation creeker with substantial rocker in the bow and a sliced-down stern. The large hull bottom and pronounced rocker profile keep you riding high on the water, making it easy to boof your way downstream. At 9 feet in length, this kayak offers a very dry-running platform that ensures high speed to safely punch through retentive holes or pick up speed on waves. The stern begins with a touch of extra volume behind the seat to provide paddling confidence, then tapers down super thin at the end of the hull, allowing for quick turns and playful maneuvers. Medium paddlers up to approximately 80 kg can use it as a full-featured creeker, while larger paddlers will enjoy the BEAST as a high-volume river runner. The PR-X seating system sets new standards in comfort and lightweight design!

Length: 274 cm/9'0" | Width: 68 cm/26.8" | Weight: 22 kg/48.5 lb | Max. Cap.: 120 kg/265 lb | Material: HTP (Blowmolded PE) | Colors: Turquoise . Neon Yellow . Pink

[PRIJON.COM](https://prijon.com)

DAGGER KAYAKS - INDRA

The Dagger Indra is here to transform your paddling experience. A familiar and confident bow is built to rise over drops, waves, and hydraulics. A wide planing hull keeps the kayak on top of the water, and a tapered deck allows the boat to slice through currents, load the stern, and skip through rapids. Camber in the wide tail turns the momentum of a climbing bow into controlled and playful downstream acceleration. Smooth, fast, predictable, and playful, the Indra is bound to be a modern classic. Included with the Indra are the all-new Contour Ergo Engage thigh braces, allowing you to customize your fit with interchangeable and adjustable thigh hooks. For ultimate comfort, control, and safety, connect with your Indra through the best-in-class Contour Ergo outfitting.

Length: 272 cm/8'9" | Width: 67 cm/26.5" | Weight: 23 kg/51.5 lb | Max. Cap.: 86 kg/190 lb | Colors: Red . Blue Mist . Green Mist

[DAGGER.COM](https://dagger.com)

PYRANHA - SCORCH X

Dave Fusilli's dream come true, now available for you! The Scorch X takes all the positives of the original design and cranks them up to 10 (including the length!): More dry rides. More skip. More speed. More fun. Dave had been dreaming of this boat for years, constantly pushing the Pyranha design team, and the concept was perfected for the regular Scorch size range. The X offers the raw, unadulterated, boundary-smashing X-perience for true connoisseurs. Skip and plane over everything with style and grace, feel unstoppable, and change the game. You won't know what you're missing until you try it.

Length: 302 cm/9'9" | Width: 64.5 cm/25.4" | Weight: 24.5 kg/54 lb | Max. Cap.: 115 kg/253.5 lb | Material: MZ3 (HDPE) | Colors: Rosella Red . Cotinga Blue | Sizes: One Size

LETTMANN - ROCKY M/L

With the Rocky, we've created the perfect symbiosis of our two favorite creek boats. It combines the Granate's stable and mild characteristics with the Manta's modern features. The new Rocky's stable hull balances high speed with excellent control. Beginners appreciate its ease in reaching eddies, while more advanced paddlers will love its performance when approaching the next waterfall. The rounded edges prevent the rapids from pushing too hard, ensuring smoother landings after high drops. The high, voluminous bow allows for a dry run even in the heaviest rapids. Combined with its pronounced rocker, the Rocky emerges dry and smoothly after every significant drop—ensuring you're always in charge!

Length: 262-272 cm/8'7"-8'9" | Width: 63.5-65.5 cm/25"-25.8" | Weight: 18-21 kg/39.7-46.3 lb | Max. Cap.: 50-100 kg/110-220 lb | Material: Superlinear HDPE | UniColors: Yellow . Red | Multicolor Options: Telemagenta/Skyblue . Skyblue/Blue . Yellow/Red . White/Lila | Sizes: M . L

ZET - CROSS

After much anticipation, the team here at ZET is excited to present our latest and most innovative creek boat yet, the CROSS. A true all-river kayak, the CROSS is a sporty, stable, and easy-to-maneuver kayak. Its long, wide rocker has been designed to move easily through waves and holes and boof beautifully even at low speeds. The flat hull and edges of the CROSS make it highly responsive. It accelerates quickly and holds its line perfectly. The CROSS carves easily and has no "catchy features," making it the perfect kayak for any whitewater purpose and environment. The CROSS is designed for paddlers in the weight range of 70 to 100 kg. Its incredible stability makes it suitable not only for expert kayakers but also for beginner and intermediate paddlers wanting to improve their skills.

Length: 274 cm/9'0" | Width: 63 cm/24.8" | Weight: 18.5 kg/40.8 lb | Volume: 233 L/61.55 G

RTM - SPY 260

The SPY 260 is a versatile river runner crafted to meet the needs of dynamic paddlers. This all-terrain river kayak is suitable for paddlers of all skill levels and excels on various watercourses. Its stability and ease of handling make it a favorite among clubs for introductory sessions on calm waters. Larger paddlers will appreciate the spacious cockpit and enhanced comfort, ensuring an enjoyable experience on the river. The SPY 260 is available in both CLUB and SUPER versions, catering to diverse preferences and paddling styles.

Length: 260 cm/8'6" | Width: 64 cm/25.2" | Weight: 20 kg/44.1 lb | Max capacity 120kg/264 lb | Cockpit: 92x52 cm/36.2"x20.5"

RTMKAYAKS.COM

RTM - SPY 235

The SPY 235 is a versatile creekboat designed for paddlers weighing up to 75 kg. This robust kayak excels in navigating courses up to Class V, making it a reliable choice for seasoned creekers tackling technical whitewater. As a river runner, it also shines in Class II to III conditions, perfect for beginners looking to gain confidence on the water. With its stable, safe, and fast design, the SPY 235 offers excellent control, ensuring a smooth ride even in large volumes.

Length: 235 cm/7'9" | Width: 65 cm/25.6" | Weight: 20 kg/44.1 lb | Max capacity 110kg/242.5 lb | Cockpit: 84x46 cm/33"x18.1"

RTMKAYAKS.COM

EXO KAYAK - LION

The EXO LION is a kayak designed to deliver high performance and excellent maneuverability. With generous dimensions, it supports paddlers over 90 kg but remains suitable for lighter users. Its design features a pronounced front rocker for navigating tough holes, while the tapered stern enhances maneuverability in critical conditions. This allows partial tail immersion for smoother boof moves, making technical control more accessible. The kayak offers outstanding stability and safety, maintaining top performance even on demanding routes. Ideal for both beginners and experienced paddlers, it combines ease of use with excitement, ensuring a memorable river experience for all skill levels.

Length: 274 cm/9'0" | Width: 69 cm/27.2" | Weight: 23 kg/50.7 lb | Max. Cap.: 110 kg/242.5 lb | Material: Polyethylene (Foam Core HDPE) | Colors: Red . Blue . Green . Yellow . Pink . Devil . Gator . Storm . Fire . Pink-Black | Sizes: One Size

EXOKAYAK.COM

LETTMANN - THE HORNY POTATO 65/85

We did it! The incredible features of our Machete inspired us to design a new creek boat. We "recycled" its flat hull and sharp edges, adding even more rocker and ample volume in the rear, making the THP a safe kayak for big water and big drops. Skipping and boofing made dry! Speaking of boofing, getting a kayak with edges as sharp as a machete to boof effortlessly wasn't easy. But while it slices through water like a bush knife through liana, its central volume package in the rear can launch you into the sky—if you want it to! Control in this creek boat is a breeze; its sensitive characteristics allow for easy corrections without slowing down, and you can turn it on the spot, almost like a half slice. You won't want to miss "The Horny Potato"—worth the shocking name!

Length: 265-274 cm/8'8"-9'0" | Width: 64.5-66.5 cm/25"-26" | Weight: 18-21.5 kg/40-47 lb | Max. Cap.: 50-110 kg/110-243 lb | Material: Superlinear HDPE | UniColors: Yellow . Red | Multicolor Options: Telemagenta/Skyblue . Skyblue/Blue . Yellow/Red . White/Lila | Sizes: 65 . 85

LETTMANN.COM

LIQUIDLOGIC - RMX

The RMX is a kayak that inspires confidence in newer paddlers tackling their first Class III while thrilling elite paddlers on their most challenging rivers. Built on the performance-driven rocker profile of the OG Remix, it combines proven agility and intuitive handling with a planing hull and sharp yet forgiving edges. This design offers exceptional glide, spin, and carving precision, making it versatile for any adventure. The Alpha-sized rocker at the bow powers through obstacles, while the steeply-peaked front ensures controlled resurfacing. The tapered tail reduces volume at the very end, enabling effortless surfing, rapid direction changes, and advanced maneuvers like skips and water boofs. Whether you're seeking stability or pushing boundaries, the RMX delivers unmatched performance.

Length: 274-289 cm/9'0"-9'6" | Width: 65-70 cm/25"-27" | Weight: 19-24 kg/42-53 lb | Max. Cap.: 26-118 kg/80-260 lb | Material: HDPE | Colors: Gold . Shark Blue . Venom | Sizes: 76 . 86 . 96

LIQUIDLOGICKAYAKS.COM

JACKSON KAYAK - CLUTCH

The Clutch combines the high-riding, confidence-inspiring performance of the Gnarvana with a sleek, lower-rockered stern engineered to enhance speed, shred surf, launch waves, and squirt eddy lines. This kayak is nimble, skips effortlessly, and offers a forgiving experience on the water. The result is a unique blend of confidence and creativity that may transform how you perceive your river adventures.

Length: 268 cm/8'8" | **Width:** 69 cm/27" | **Weight:** 21 kg/46 lb | **Paddler Weight Range:** 59-100 kg/130-220 lb | **Colors:** Mystic . Red . Rio . Venom | **Sizes:** M/L

PYRANHA - FIRECRACKER

Explosive, downriver freeride energy that everyone can enjoy! Set it off! The Firecracker is a compact half-slice designed to whip into every micro-eddy, snap onto every wave, and get vertical absolutely everywhere. No matter who you are, you'll be able to throw this boat around, sky-gaze, and have the comfort and confidence to nail that new move.

Length: 242 cm/7'9" | **Width:** 66 cm/26" | **Weight:** 19 kg/41.9 lb | **Max. Cap.:** 90 kg/198.4 lb | **Material:** MZ3 (HDPE) | **Colors:** Rosella Red . Cotinga Blue | **Sizes:** 232 . 242 . 252

PYRANHA.COM

LIQUIDLOGIC - SWEET RIDE

The Sweet Ride is a half-slice kayak designed for playful, progressive river running. With standout features inspired by the RMX bow rocker, it pops over obstacles effortlessly and encourages creative new lines. Its large hull platform and rocker profile keep you on top of the water, allowing for easy skipping downstream and precise spins. The edges are sharp enough for control but slightly tucked to prevent snagging on rocks. The performance-driven stern starts with extra volume behind the seat for confident downstream movement, then tapers at the end of its sleek 9-foot length for quick pivot turns, squirts on eddy lines, and splats on rocks. The Sweet Ride is the perfect blend of fun and performance for paddlers looking to elevate their river-running game, turn quickly, squirt on eddy lines, and splat that rock.

Length: 274 cm/9'0" | Width: 67 cm/27" | Weight: 20 kg/46 lb | Max. Cap.: 54–108 kg/120–240 lb | Material: HDPE | Colors: Gold . Shark Blue . Venom

PYRANHA - FUSION DUO

Double the paddlers, double the fun! Share your love of kayaking with friends and family, whether they're new or as passionate as you are. Like the regular Fusion, the Fusion Duo is built to handle both whitewater and touring, making it highly capable across most environments you'd explore with a tandem kayak.

Length: 462 cm/15'2" | Width: 71 cm/28" | Weight: 42 kg/92.6 lb | Max. Cap.: 230 kg/507.1 lb | Material: MZ3 (HDPE) | Colors: Rosella Red . Cotinga Blue | Sizes: One Size

[PYRANHA.COM](https://pyranha.com)

PYRANHA - FUSION II

Don't get cross, get a crossover! The Fusion II lets you combine whitewater and touring for even bigger adventures. Whether you're new to kayaking and exploring your preferences or seeking boundless adventures that blend the thrill of whitewater with serene lake paddling, the Fusion II has you covered. It even includes a spacious hatch, perfect for overnight trips or a scenic picnic.

Length: 315 cm/10'4" | Width: 66 cm/26" | Weight: 23 kg/50.7 lb | Max. Cap.: 110 kg/242.5 lb | Material: MZ3 (HDPE) | Colors: Rosella Red . Cotinga Blue | Sizes: S . M . L

[PYRANHA.COM](https://pyranha.com)

PYRANHA - ION

Compact. Light. Reliable. From learning the basics to varied adventures, the Ion is the kayak equivalent of a multi-tool. A shorter boat is better suited to shorter journeys, as well as being more maneuverable and easier to transport and store. Since the Ion isn't designed for the more committing adventures of its larger sibling, the Fusion, the outfitting has been kept functional yet simple and light. This reduces not only the overall weight of the boat but also the complexity of getting it set up and ready to go.

Length: 274 cm/9'0" | Width: 76 cm/29.9" | Weight: 20 kg/44.1 lb | Max. Cap.: 115 kg/253.5 lb | Material: MZ3 (HDPE) | Colors: Rosella Red . Cotinga Blue | Sizes: S/M . M/L

[PYRANHA.COM](https://pyranha.com)

DAGGER KAYAKS - KATANA ACTION

The excitement of whitewater, with the freedom to paddle further. The Katana will take on rapids and glide through calm water, with plenty of room in the stern for gear and robust outfitting for everyday use. Comes equipped with conformable action outfitting and bulkhead footrest.

Length: 292 cm/9'7" (9.7 model) . 315 cm/10'4" (10.4 model) | Width: 65 cm/25.5" (9.7) . 69cm/27.1" (10.4) | Volume: 299 L (9.7) . 393 L (10.4) | Weight range: 45-95 kg/99-209 lb (9.7) . 70-129 kg/154-284 lb (10.4) | Material: High density polyethylene | Colors: Red . Lime . Orange . Blue

YASKA - STAND-UP PADDLE BOARD

The Stand-up Paddle Board is made from high-strength drop-stitched PVC, ensuring superior rigidity while being 2 kg lighter than traditional glued boards. Its durable heat-welded construction is reinforced with two layers of PVC (0.9mm + 0.52mm) on both sides for added strength. Weighing around 10 kg, it's portable and easy to store, coming with a backpack that includes a hand pump, wrench, repair kit, and paddle. The high-density rubber air-seal valve minimizes leakage, and the board supports a loading capacity of 150 kg for a safe experience. Detachable fins protect against damage during transport, while handmade EVA splicing and UV printing prevent fading. The board undergoes rigorous quality control, including a 24-hour inflation test before shipping. CE 1521, EN 15649, and ISO 9001 approved, it comes with a one-year warranty and free OEM/ODM options available.

Length: 335 cm/11'0" | Width: 81 cm/32" | Thickness: 15 cm/6" | Weight: 12 kg/26 lb | Max. Cap.: 150 kg/330 lb | Material: Drop Stitched + EVA | Colors: Printed

MINT LAMA - ADVENTOURER 11'6"

The Adventourer 11'6" is the ultimate board for paddlers seeking versatility and performance. Its sleek, pointed shape ensures speed and precise maneuverability, while the wide platform supports both dynamic activities and relaxing pursuits like yoga or Pilates. Designed to accommodate lighter and heavier paddlers, it offers efficient paddling with minimal effort. Constructed with a Single Layer + Stringer design, it features a nearly invisible 25 cm-wide wood-patterned stringer on the top and bottom for added rigidity and durability, reinforced by double-layered rails for superior side protection. The EVA pad with a crocodile skin texture provides exceptional grip and comfort. Included are a high-quality wheel backpack, a hybrid carbon SUP/kayak paddle, a high-volume dual-action pump, a touring fin, a kayak seat, a leash, and a repair kit. Additional features like a D-ring for kayak conversion, a side paddle holder, and a sports camera mount make this board adventure-ready.

NRS - CLIPPER SUP BOARD 11'0"

The winner of the Paddle Sport Product of the Year Award in the Stand-up Paddleboard Category, the NRS Clipper SUP Board is designed with the explorer in mind. Shaped using our Integrated Shaping Technology (IST™), the Clipper uses multiple air chambers to create a unique shape purpose-built for touring and long distance paddles. The V-Hull design uses IST to add a "V" shape to the board nose for enhanced tracking and efficiency, and the DropDeck™ provides outstanding stability by raising the deck rails and dropping the board's main deck to lower the paddler's center of gravity. Nose and tail deckline configurations let paddlers securely rig gear for every outing, from quick paddles after work to multi-day expeditions. Available models 110, 110W, 126 and 126W.

Length: 335.28 cm/11'0" | Width: 68.6 cm/27" | Thickness: 12.7 cm/5" | Weight: 9.16 kg/20.2 lb | Volume: 216 L/57 gal | Max. Cap.: 83.91 kg/185 lb | Material: PVC outer; Z/Blend woven polyester drop-stitch core | Sizes: 110 . 110W . 126 . 126W

AQUA MARINA - HYPER BT-23HY01

Adventure knows no boundaries with our HYPER inflatable SUP. With its sleek, modern silhouette and generous volume, you'll enjoy excellent cruising efficiency, straight-line tracking, and superior loading capacity for all your gear. Perfect for multi-day trips or exploring greater distances, the HYPER is ideal for both first-timers and seasoned paddlers alike. HYPER models are equipped with rectangular hydrodynamic rail edges (REC Edge™) for clean water release, and a FORE KEEL™ design for improved water stroke and straight-line tracking.

Length: 350 cm/11'6" | Width: 79 cm/31" | Weight: 11.5 kg/27.6 lb | Max. Cap.: 150 kg/330 lb | Material: PVC, Drop-stitch Core | Colors: Grey . Blue

[AQUAMARINA.COM](https://www.aquamarina.com)

AQUA MARINA - CORAL TOURING BT-23CTPR

The CORAL TOURING board offers a unique cruising shape, ideal for all trekking enthusiasts. Effortlessly cover greater distances with exceptional glide and maneuverability. This lightweight touring board is perfect for calmer waters or mild waves while remaining ultra-portable. Its sleek outline features a moderate nose rocker for better control and effortless paddling. Weighing just 9.3kg, this board is easy to pack into its convenient backpack, ready to help you discover your next wondrous destination.

Length: 350 cm/11'6" | Width: 79 cm/31" | Weight: 9.3 kg/20.5 lb | Max. Cap.: 130 kg/286 lb | Material: PVC, Drop-stitch Core | Colors: Raspberry

[AQUAMARINA.COM](https://www.aquamarina.com)

SIC - RS AIR

The RS Air's refined outline and welded seams make it the best displacement-shaped, all-water, multidiscipline inflatable for fitness, touring, and race.

Length: 427 cm/14'0" | Width: 75 cm/28" | Volume: 350 L/92.5 gal

[SICMAUI.COM](https://www.sicmaui.com)

HARDBOARD

THESE BOARDS WILL GET YOU FROM A TO B, WHETHER YOU'RE INTO SERIOUS RACING, FITNESS, CROSS TRAINING OR SIMPLY WANT GREAT GLIDE AND EASE OF PADDLING.

SIC - RST

The NEW RST all-water raceboard features a dugout cockpit and lightweight Super Fly molded carbon sandwich construction. It delivers exceptional agility in choppy waters and heavy swell without compromising its excellent glide on flat water.

Length: 426.7 cm/14'0" | Width: 58.4 cm/23.0" | Weight: 11.9 kg/26.2 lb | Volume: 290 L/76.6 gal | Material: Super-Fly Technology

[SICMAUI.COM](https://www.sicmaui.com)

INDIANA - 12'6" TOURING S CARBON/WOOD

The 12'6" Touring Wood Hardboard is the perfect blend of performance and style, meeting all the demands of a top-tier touring board. Its sleek 27.5" width ensures exceptional speed without compromising stability, making it ideal for long-distance paddling. The all-round carbon fabric construction delivers lightweight durability, while the Paulownia wood veneer deck adds an elegant touch, making it as visually stunning as it is functional. Designed for paddlers seeking speed, stability, and beauty on the water.

Length: 381 cm/12'6" | Width: 70 cm/27.5" | Thickness: 21.1 cm/7 1/8" | Volume: 283 L/74.8 gal | Weight: 13.5 kg/29.8 lb | Recommended Rider Weight: 65-100 kg/143-220 lb | Fin: 8.5" Hyperflow Carbon Race Fin | Material: EPS Foam . Carbon . Fiberglass . Wood Veneer . Epoxy | Construction: Carbon . Wood Veneer Sandwich | Production Technique: Vacuum Bag | Pad: Crocodile Groove | Shaper: Andi Widmann | Warranty: 2+1 years | Optional: Available with bag

[INDIANA-PADDLESURF.COM](https://www.indiana-paddlesurf.com)

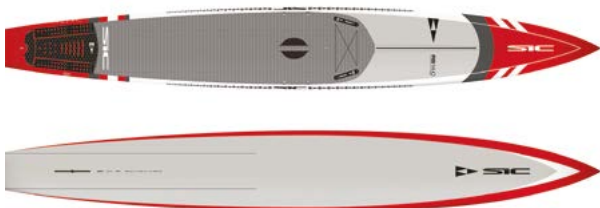

SIC - RS

The RS is fast in flat and all-water conditions, helping you reach your top-end speed. It's the most trusted performing race board on the market.

Length: 427 cm/14'0" | Width: 58.4 cm/23" | Volume: 350 L/92.5 gal

[SICMAUI.COM](https://www.sicmaui.com)

SIC - OKEANOS 14'0"

The Okeanos is a fitness and touring board that has won awards such as the SUPConnect "Best Touring Board" and "Best Overall Board." This touring and fitness board paddles with ease and maintains a fast and efficient glide. The nose chine in the bow helps to soften the ride in rough waters and tracks extremely well under power in wind and cross-chop. The generous tail width and full, squared-up rails help make this board very stable. The wide point in the board's front section has shifted forward, adding to the overall stability. The board has also been outfitted with numerous tie-downs to mount your cargo. It is super stable rail-to-rail making this a great board to fish off.

Length: 426 cm/14'0" | Width: 71 cm/27.9" | Weight: 14.6 kg/32 lb | Max Cap.: 125 kg/275 lb

[SICMAUI.COM](https://www.sicmaui.com)

INDIANA - 14'0" DHC RACE DUGOUT HOLLOW CARBON 21.5"

The new Dugout Hollow Carbon Raceboard. Only 21.5" narrow, it guarantees a lot of speed. Due to the low standing position in the dugout and the high, steep rails, the board by shaper Andi Widmann is still very stable. The nose scoop is so high that the narrow nose flies freely over the chop and cuts through the waves as soft as butter even in difficult conditions. The middle area is gently rocked through, which means that the wetted area can be reduced as much as possible. The slightly monoconcave, parallel channel in the underwater hull ensures reduced frictional resistance and optimized directional stability. The tail kick prevents the tail from being sucked in, it also enables tight buoy turns and guarantees the best downwind properties in rougher conditions. The square detail with sharp edges up to the fin ensures a perfect tear-off of the water.

Length: 426.7 cm/14'0" | Width: 54.6 cm/21.5" | Material: Carbon . Airex Foam | Construction: Hollow Carbon

WHITEWATER BOARDS

BOARDS CREATED FOR CHALLENGE OF PADDLING WHITEWATER. THOSE BOARDS ARE STRONGER AND WIDER, DESIGNED TO CRUISE OVER CURRENTS AND EDDIES.

SKATINGER - ASIATICUS

Introducing the Asiaticus, the perfect family whitewater SUP designed for comfort and stability on the water. With its ultra-wide design and improved balance, the Asiaticus offers an exceptionally stable paddling experience, making it ideal for beginners and families. The wider nose enhances buoyancy and tracking, ensuring smooth navigation through challenging rapids. This versatile SUP comes fully equipped with essential accessories, including adjustable seats, storage compartments, and safety features, allowing for a seamless and enjoyable adventure on rivers and lakes. Whether you're planning a thrilling day of whitewater fun with the family or a relaxing outing, the Asiaticus is your go-to choice for unforgettable memories on the water.

Length: 350 cm/11'6" | Width: 89 cm/35" | Weight: 16.3 kg/35.9 lb | Max. Cap.: 200 kg/440.9 lb | Material: Drop Stitch PVC | Colors: Dark Blue

[SKATINGER.COM](https://www.skatinger.com)

SKATINGER - PRANA

Introducing the Prana, the ultimate family whitewater SUP designed for maximum stability and fun on the water. Featuring an ultra-wide design and improved balance, the Prana provides an incredibly stable paddling experience, making it perfect for families and beginners alike. The wider nose enhances buoyancy and tracking, ensuring smooth navigation through challenging rapids. Equipped with full accessories, including adjustable seats, storage compartments, and safety features, this versatile SUP is ready for any adventure. Whether you're tackling exciting whitewater conditions or enjoying a leisurely day on the lake, the Prana guarantees an unforgettable experience for the whole family.

Length: 350 cm/11'6" | Width: 89 cm/35" | Weight: 16.3 kg/35.9 lb | Max. Cap.: 200 kg/440.9 lb | Material: Drop Stitch PVC | Colors: Dark Blue

[SKATINGER.COM](https://www.skatinger.com)

NRS - CLEAN 96

The Clean SUP Board turns clean-line dreams into a reality. Featuring a significant continuous tail and nose rocker, the Clean transforms rapids into a paddling playground. Downriver paddlers can choose between two sizes—a shorter playful board or the Clean 11, intended for multiday adventures. Woven drop stitch ZBlend Core™ inflates to 20 PSI for unmatched rigidity. The DropDeck™ enhances stability by raising the deck rails to maintain volume and dropping the deck to lower the paddler's center of gravity. Double sidewalls and concave design uses three chambers to create concavity on the rails, which channels water back toward the fin for a cleaner flow of water and more efficient and quieter ride.

Length: 289.56 cm/9'5" | Width: 91.44 cm/36" | Thickness: 12.7cm/5" | Weight: 10.4kg/23 lb | Volume: 251 L/55.21 gal | Max. Cap.: 95.24 kg/210 lb | Material: PVC . Z/Blend woven polyester drop-stitch core | Sizes: Clean 96 . Clean 110

[NRS.COM](https://www.nrs.com)

LEVEL SIX - RIVER SURFER

While we built the River Surfer Inflatable SUP with river waves in mind, it can be used in the ocean too. While you'll never get the same performance as an epoxy board carving on a wave due to the rail shape, we made the board as thin as possible without sacrificing stiffness. The carbon laminated sidewalls, raised deck pad and quad fin set up will let you surf any wave small or large.

Length: 259 cm/8'6" | Width: 83.8 cm/33" | Thickness: 11.9 cm/4.6" | Max. Cap.: 104.3 kg/230 lb | Material: Mono layer fusion drop-stitch | Colors: Aegean Blue

[LEVELSIX.EU](https://www.levelsix.eu)

INDIANA - 10'2" RIVER INFLATABLE

The bigger of the two River SUPs is suitable for wild waters and longer tours on rivers. Thanks to the baggage cord with six attachments, your outdoor equipment can be fastened on the 10'2" River SUP without problems. The shape impresses with a functional outline where the widest point of the SUP is behind the middle. The special volume distribution, in combination with a progressive rocker line on the front and the rear end makes the board very agile and allows precise steering. The length is ideal for beginners and heavy paddlers. The distribution of the volume ensures stability and keeps the board on track when passing through rapids. With an additional PVC strengthening on the rear end, the construction with Woven Real Double Layer leaves no room for desires when it comes to stiffness, durability and weight.

Length: 310 cm/10'2" | Width: 76.2 cm/30" | Thickness: 15 cm/6" | Material: Woven Drop-stitch . PVC

INFLATABLE

INFLATABLE FOIL BOARDS FOR EASIER STORAGE AND TRANSPORTATION.

TAHE - ARIA 5'8" AT

The ARIA 5'8" stands as one of the most thrilling additions to our wing foil range, proudly manufactured in France at our production site in Vannes—a groundbreaking achievement. This new shape marks an entry point for wing foilers seeking a rigid board at an affordable price. Crafted with durable yet lightweight ACE-TEC technology, this board is a testament to our 40 years of experience in windsurfing. Its shape has undergone rigorous testing and challenges by our team in various conditions throughout Brittany, France, ensuring performance and reliability.

Length: 152.4 cm/5'8" | Width: 71 cm/28" | Weight: 7.9 kg/17.4 lb | Max. Cap.: 110 kg/242 lb

[TAHESPORT.COM](https://tahesport.com)

TAHE - ARIA 5'11" AIR

The Aria Air is the ideal inflatable board for learning and progressing WingFoiling. The carbon fiber mounting plate under the foot pad is ultra-rigid and helps guarantee performance similar to rigid boards. Compact, and easy to store.

Length: 180 cm/5'9" | Width: 72 cm/28" | Volume: 130 L/34 gal | Material: Drop-Stitch

[TAHESPORT.COM](https://tahesport.com)

INDIANA - WING FOIL 149 L INFLATABLE

With the 149 L SUP / Wingfoil Inflatable developed by foil expert Gunnar Biniash, even heavier foilers can fly, with a paddle or with a wing. It is almost indestructible and ideal for traveling. Its construction with woven real double layer, the fiberglass compression belts and the thickness of 6" make it extremely stiff and direct. The reinforcement of the boxes prevents the board from sagging before the foil. The V-footstraps can be installed optionally. The handle on the nose helps to get the board through the shore break successfully. All Wingfoil boards feature lightweight M6 Footstrap Inserts for V-Straps for Winging. The new corrugated pad is designed for maximum comfort and lateral grip whilst allowing you to easily move your feet forward and backward when trimming the board in flight.

Length: 182 cm/6'0" | Width: 71 cm/28" | Thickness: 15 cm/6" | Material: Woven Drop-stitch . PVC | Construction: Real Double Layer . Top & Bottom: Fiberglass Stringer

The KuNalu, a downwind specialist for SUP, wing, and light wind foiling, is our most performance-driven foil board yet. It provides exceptional stability and effortless porpoising before pop-up, offering a fluid, responsive ride with the agility of a shorter board.

Length: 241.3 cm/7'11" | Width: 50.8 cm/20.0" | Weight: 6 kg/13.2 lb | Volume: 115 L/30.3 gal | Material: Super-Fly Lite Technology

SICMAUI.COM

INDIANA - DOWNWIND SUP FOIL 7'6"

The Indiana Downwind/Flatwater Foil Boards are meticulously designed to optimize maximum glide and early release. Crafted by our shaper, Gunnar Biniasch, these boards seamlessly integrate elements from surf, wind, and kite-foil designs, along with features inspired by SUP Race boards. The result is a unique bottom shape tailored specifically for downwind SUP Foiling. The concave rails tapering to the tail create a dual-functionality: first, a thin keel in the tail for an early glide and easy water release, and second, a wider deck section above the keel providing stability for paddling in calm water and navigating through bumps. The round bottom underneath the front foot ensures an instantaneous release from the water, enabling quick acceleration. The narrow outline and small width contribute to effortless water cutting, facilitating smooth acceleration for an unparalleled downwind foil experience.

Length: 229 cm/7'6" | Width: 51 cm/20" | Thickness: 14 cm/6" | Volume: 112.5 L/30 gal | Weight: 8 kg/18.5 lb

SIC - SLASH

The Slash range in carbon construction (mast and wings) is all about maximum glide, high-speed, and hard carving for those who want to push Wing Foiling to the maximum. New & innovative flipping central fuselage: allowing you to trim your foil performance simply by flipping the orientation of the fuselage. Adjustment towards maneuverability or pumping.

Mast: 90 cm/35.5" | Stab: 250 cm² | Fuselage: 73 cm | FW: 1200 cm² | Material: aluminum + Carbon

SIC - RAPTOR WING V3 5.0M

The Raptor Wing V3 unleashes predator power, crafted by our team of experts to meet the needs of even the most demanding riders with exceptional features and unparalleled performance. The new lower aspect ratio shape, combined with a segmented leading edge, provides better wing tip control while turning and increased stability during free-flying and wave riding. The redesigned center strut with mini booms offers superior comfort and power management for efficient pumping. Safety is our top priority, and we've added new windows to enhance visibility and meet upcoming safety requirements for racing.

Size: 5.0 m² | Other size available: 2.5 . 3.0 . 3.5 . 4.0 . 4.5 . 6.0 . 7.0

TAHE - ALIZÉ WING 4.0

Just like the warm, steady winds that blow in the tropics, the Alizé Wing is light and stable. Guaranteed take-off! Easy to control, its compact design allows you to enjoy your ride without touching the water. Its rigidity makes sailing simple and reduces the risk of flapping. Available in five sizes.

SHAPED FOR ADVENTURE

For more than 50 years, NRS has been the world's leader in outfitting adventures on the water. Today, we are reimagining SUP by hand-shaping inflatables for you and your paddling style. Using advanced technologies and design techniques, we have created a new line of stiffer, lighter, more stable and efficient inflatable SUPs.

Whether you're loading the car for a weekend at the lake, launching on a multiday tour, squeezing in an after-work workout, or charging whitewater on your local day stretch, our shaped-in-Idaho inflatables deliver unmatched performance you can take with you anywhere.

IST™

Multiple air chambers provide a unique shape, purpose-built for specific paddling styles.

Z/BLEND™

Innovative woven (rather than knit) drop-stitch core creates a stiffer, lighter board.

Double PVC sidewalls maximize durability and ensure 100% air retention.

Raised rails combine with dropped deck to lower paddler's center of gravity and increase stability.
